THE TREATY IS AMENDED

United States Left Free to Fortify the Canal at Will.

SPEECH BY SENATOR TELLER

One of the Features of Executive Session of the Senate Date For Test Vote.

Washington Dec 7—The developments in the senate in the executive session today in connection with the Hay Pauncefote treaty were

An agreement on the part of the senate to vote on the amendment offered by the committee on foreign relations providing for the policing of the canal on next Thursday at 3 o clock

An amendment offered by Senator Teller striking out of the treaty prohibition against the fortification of the Nicaragua canal when constructed

The conclusion of Senator Morgan s speech

A speech by Senator Teller in opposition to the treaty

An agreement for a vote on the committee amendment was secured soon after the executive session began It was reached by unanimous consent to a request made by Senator Lodge Senator Lodge did not ask to have a date fixed for a vote on the treaty itself believing the fate of the measure will be determined by the result of the vote on the amendment

Senator Morgan in his speech went over the same grounds covered by him yesterday saying he desired simply to clear up some misapprehension concerning his position

Senator Teller spoke for about two hours giving notice of his amendment at the beginning of his address The amendment suggested relates to section 7 of article 2 of the treaty As that section now stands it reads as follows

'No fortifications shall be erected commanding the canal or the waters adjacent The United States however, shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder

The Colorado senator s amendment provides for the striking out of the first sentence of this provision and for verbal changes in the remaining portion making it read as follows

The United States shall be at liberty to maintain such military force along the canal as may be necessary to protect it against lawlessness and disorder

Mr Teller contended that if the United States desired to build the canal it should proceed to do so without trying to secure the consent of Great Britain He said that the opinion of Secretary Hay that the abrogation of the Clayton-Bulwer treaty was necessary as preceding performance after all was only the opinion of one man then he quoted from public documents to show that former secretaries of state had differed in their opinions in this respect He also showed that in some instances there had been breaches of the Clayton Bulwer treaty He quoted Secretary Evarts as saying that the guarantee of neutrality is one thing while the question is unsettled and quite another when the canal shall be opened in the interests ambition and cupidity of the commercial nations and is occupied by populations of foreign allegiance and discordant habits

Secretary Blaine also was quoted on the same point

Replying to Senator Morgan Senator Teller expressed the opinion that Great Britain never would permit her resentment of independent action by the United States to lead her to begin hostilities because her material interest in maintaining peace with this country is too great But he argued that to ask England s assent to the construction of the canal was to admit that that country had a right to express dissent. That position he said never would be accepted by the people of this country

COMMITTEE'S REPORT ON WAR REVENUE REDUCTION

Washington Dec 7—Chairman Payne of the ways and means committee today submitted the report of that committee signed by all the Republican members in favor of the bill reducing the war taxes about $40 000 000 The report says in part

'While the war for which these additional taxes were levied is ended the train of extraordinary expenditures has not terminated with the close of actual hostilities We find it still necessary to maintain an army of 100 000 men until law and order is fully restored in all our possessions We find it also necessary to provide troops to man the fortifications which we have been building the past few years and also to provide a sufficient force in the navy to man the vessels we have recently added The increasing navy too brings new necessities all of which call for a greater drain upon our resources

According to the report of the secretary of the treasury the receipts from all sources for the fiscal year ended June 30 1900 were $669 595 431 while the total expenditures were $590 068 371 showing a surplus of $79 527 060 He also estimates the receipts for the fiscal year ending June 30 1901 upon the basis of existing laws at $687 773 253 and the expenditures at $607 773 253 which would leave an estimated surplus of eighty millions of dollars For the fiscal year ending June 30 1902 the secretary of the treasury estimates the revenues at $ 16 633 042 and the expenditures at $690 374 804 leaving an estimated surplus of only $26 258 238 It will be seen that for 1902 there is an estimated increase in the revenue of $1 000 000 over the previous year and an increase of expenditures of nearly $73 000 000

The committee are inclined to take a more conservative view of the amount of the expenditures necessary for the year ending June 30 1902, at the same time they are anxious to avoid any deficiency in the future They deem it safe to make a reduction of about $40 000 000 while the secretary of the treasury in his report suggests a reduction of only $80 000 000 in the revenue

In making the reductions in the bill reported the committee have sought to remove the more annoying taxes in the war revenue act by the entire abolition of those which seemed to have proved a great burden upon the several branches of trade to which they are applied

On beer a war tax of 85 cents a barrel was added to the tax of $1 a barrel previously imposed The committee recognize that the manufacturers of beer have some claim in the general reduction of the war revenue and they believe the amendment proposed in section 1 of the bill making a net reduction of 25 cents a barrel gives them all the relief to which they are entitled in view of the reduction carried by the bill

In the war revenue act the tax upon cigars averaging more than three pounds in weight to the thousand was made $3 60 This 60 cents per thousand was very onerous to the manufacturers The committee have therefore reported an amendment reducing this tax at the rate of 60 cents per 1 000

The report then gives the changes in detail with estimated amount of reduction which has heretofore appeared It continues

"The two cent stamps on bank checks certificates of deposit drafts postal money orders etc. are very annoying to a large class of people and much complaint has been made to the committee especially from the smaller towns and from farmers Another source of annoyance has been the tax of one cent on express receipts and telegraph messages There is no doubt that this taxation has caused more widespread annoyance and trouble than anything else in the act The committee therefore have stricken these taxes from the law The tax upon deeds and conveyances has been quite burdensome in numerous instances as well as the tax upon insurance and leases The tax upon promissory notes and mortgages has been very onerous upon the debtor class.

The committee have completed all of Schedule B except from the tax upon wines This includes the tax upon proprietary medicines and articles of a similar nature There has been greater protest against the enforcement of this tax than against any other in the whole law

The committee recognizes that wines were entitled to as much reduction as beer but there did not seem to be any convenient way to divide the tax of one cent upon a pint bottle and therefore have left it the same as in the original act

Mr Payne said today that he would call up the bill in the house next Tuesday after the legislative bill is passed No programme for debate has been fixed but Mr Payne has asked the minority leaders to confer and let him know what time is desired with a view of arranging the limits of debate

JUDGE CHARLES WRIGHT

Tucson Ariz Dec —Judge Charles Wright died this morning after a short illness from appendicitis He was a former attorney general of Colorado

CAPITAL PUNISHMENT

German Case Which Attracted Much Attention in Berlin

Berlin Dec — August Goenczi the Hungarian who murdered a wealthy widow named Schulz and her daughter here in 189 was beheaded this morning in the prison of Ploetzensee The murder was an atrocious one and was committed in the center of Berlin The murderer was ultimately traced to Brazil through a pet dog and was arrested at Rio Janeiro a year ago

Capital punishment is so unusual here that the execution attracted considerable attention

POSTAL RECEIPTS

Washington Dec —The report of the third assistant postmaster general shows that the total receipts from all sources of postal revenue during the year amounted to $102 354 579 while the expenditures reached $107 740 267 The value of the total number of pieces of stamped paper issued to postmasters was $97 657 771 a net increase over the issue of the previous year of $7,536 111

The report says that the most of the abuses of the second class mail matter have been eliminated or curtailed but urged legislation on book serials premiums for subscriptions and the return of unsold matter to news agents It is also asked that congress be urged to pass an act consolidating the third and fourth classes of mail matter Recommendation is made that the sum of $10 000 be appropriated for the issuance free to the public of a pamphlet containing postal information for reference

The report comments upon the excessive number of articles registered free by the executive departments and says the abuse of the registered mail in this respect will continue until congress acts in the matter It is said that could the amount paid as indemnity for lost registered first class domestic mail be raised to the full value not exceeding $200 many letters which now pass in the ordinary mails would be gathered into the registered mails An indemnity fund not exceeding $25 000 is estimated to be sufficient for this purpose

FEDERATION OF LABOR.

Louisville Dec 7—The business of the second day s session of the Federation of Labor was completed this morning All the reports were called for by President Gompers but none save that of the credentials committee was ready and it was acted upon

Following this came up a debate over the garment workers differences

Several minor resolutions were presented by the title and referred and on suspension of the rules with but a single vote against it the convention adjourned until tomorrow morning to give the committees opportunity to complete their reports

A vigorous protest was made by the United Garment Workers against the seating of delegates from the Chicago Federation of Labor for having admitted the custom clothing makers The protest resulted in the Chicago federation receiving instructions to throw out the custom clothing makers on penalty of being themselves expelled from the American federation

Adjournment was then taken until 9 o clock tomorrow morning

LIVE STOCK EXPOSITION

Chicago Dec 7—This was college day at the International Live Stock exposition The regular judging of stock has been finished and today twenty three students representing the agricultural colleges with exhibits in the various departments started inspecting and passing on the merits of the animals on exhibition that had not been passed upon by the regular judges Prizes of $1 000 in cash and a silver cup are offered to the students showing the best judgment this point to be decided by the regular judges who will examine the stock passed upon by the students and decide on the merits of the different animals The work of the students drew an immense crowd to the exposition

OLEO BILL WAS PASSED

Overwhelming Majority of the House Voted for the Measure.

TO PROTECT BUTTER EATERS

Increased Tax on Oleomargarine Colored Imitation of Butter Decrease on the Uncolored.

Washington Dec 7—The house today passed the Grout oleomargarine bill by a vote of 196 to 92 The substitute offered by the minority of the committee on agriculture which imposed additional restrictions on the sale of oleomargarine to prevent its fraudulent sale as butter and increased the penalties for violations was defeated by a vote of 113 to 178

The bill as passed makes all articles known as oleomargarine butterine imitation butter or imitation cheese transported into any state or territory for consumption or sale subject to the police power of such state or territory but prevents any state or territory from forbidding the transportation or sale of such product when produced or sold free from coloration in imitation of butter The bill increases the tax on oleomargarine colored in imitation of butter from 2 to 10 cents per pound and decreases the tax on oleomargarine uncolored from 2 cents to a quarter of a cent per pound

Features of the Debate

A long and interesting debate preceded the vote in the course of which those who favored the Grout bill claimed the additional tax on colored oleomargarine was the only effective remedy for preventing fraud upon the public while those who opposed it contended that fraud would be prevented by the substitute and that the real purpose of the Grout bill was to destroy the oleomargarine industry

In discussing the measure Mr Henry (Conn) said that the enormous amount of fraud and the illegal selling of oleomargarine was due to the great profits derived from the sale of the imitation because of its absolute counterfeit of butter Thirty-two states already had absolutely forbidden the manufacture and sale of oleomargarine colored in imitation of butter he said and this fact proved conclusively the policy of a large majority of the people against the existence of imitation butter in counterfeit form

Mr Henry went exhaustively into the figures as to the cost of manufacturing the article to show that including the payment of the present internal revenue tax of 2 cents it was not more than 10 cents per pound

Mr Henry said the increase of the tax would prevent the large profits which were the incentive to violate the laws of the state and government and defraud innocent purchasers, while the reduction of the tax on oleomargarine in its natural color would enable those who desired to consume it to procure it at a lower cost than heretofore

The Minority Position

Mr Wadsworth (N Y) chairman of the committee on agriculture who with six other members of the committee signed the minority report against the Grout bill, asserted with emphasis that the minority were just as earnest in their desire to prevent the fraud now practiced in the sale of imitation butter as the majority could be The only difference was that the minority recognized the value of oleomargarine as a wholesome and nutritious article of food and entitled to a place as a food product. In support of this statement he read the testimony of a number of scientific men He charged that the purpose of the supporters of the Grout bill was to destroy the manufacture of oleomargarine not to regulate its sale The bill prepared by the minority he added would eliminate all possibility of fraud by compelling the sale of oleo in original packages of one or two pounds stamped with the world oleomargarine and bearing the internal revenue tax stamp and imposing additional and heavy penalties for violations of the law

Mr Grout in support of the bill declared that its purpose was to suppress fraud in the sale of a food product by preventing the coloring of oleomargarine in imitation of butter Over 104 000 000 pounds of oleomargarine had been manufactured and sold last year That was about one ninth of the total butter consumption of the United States

Mr Bartlett (Ga) moved to strike out the proviso that nothing in the bill should be construed to permit any state to forbid the manufacture or sale of oleomargarine in such form as would advise the consumer of its real character free from color The amendment was lost—48 to 11

An amendment was adopted providing that the act should go into effect July 1 1901

Mr Bailey (Texas) closed the debate against the bill He contended that the pretense of the bill—that it was to prevent fraud—was itself a fraud

Mr Wadsworth (New York) on behalf of the minority of the committee then offered the substitute prepared by the minority

The substitute was defeated—113 to 178 The bill was then passed 196 to 92

Those voting in the negative were

Aldrich Allen (Ky) Allen (Miss) Atwater Bailey (Kan) Bailey (Tex) Ball Bankhead Bartholdt Bartlett Bellamy Boutelle (Ill) Brantley (Ga.) Bromwell Broussard (La) Burke (Tex), Burleson Burnett Burton Carmack Catchings Clayton (Ala) Clayton (N Y) Cooper (Tex) Cowherd Cummings Cusack Davis De Graffenreid Finley Fleming Foster Fowler Fox Gaines Gayle Griggs (Ga) Grosvenor Hawley Hay Hedge Henry (Miss) Henry (Texas) Johnston Joy Kitchen Kleberg Lanham Lassiter Latimer Lester Lewis Linney Little Livingston Long Lorimer Loud Lovering McClellan McCulloch McDermott Mann McClain McRae Laphen Noonan Pearce (Mo) Pierce (Tenn), Ransdell Rhea (Ky) Rhea (Va.) Richardson (Ala) Shephard Sims Slayden, Smith (Ky) Snodgrass Sparkman Stephens (Tex) Stewart (Wis.) Stokes Talbert Taylor (Ala.) Terry Thomas (N C) Underwood Wade Wheeler White, Williams (Miss) Wilson (S C)

Mr Payne chairman of the ways and means committee reported the war revenue reduction bill He gave notice that he would call up the bill after the disposition of the legislative appropriation bill probably on Tuesday

On account of the centennial exercises in the house on Wednesday it was agreed that the session on that day should begin at 3 [illegible] o clock and at 5 55 o'clock the house adjourned

THE COMMISSIONER FROM PUERTO RICO

Washington Dec 7—The commissioner from Puerto Rico Mr F Degetau recently elected by the people of the island to represent them in congress and in Washington generally is expected at the house of representatives in a few days and a large amount of mail is being held for him by the house officials Representative Cooper of Wisconsin chairman of the insular committee will make him at home in the quarters of that committee

His status on the floor is somewhat in doubt He is designated in the law as a resident commissioner and is to receive a salary of $5,000 annually On filing his credentials with the state department he is to receive official recognition by all departments There is no provision for his admission to the floor of the house or for participation in debates, similar to the provision for delegates from territories. It is expected however, that he will advise and assist committees concerning Puerto Rican legislation and steps may be taken to admit him to the floor

From the forwarding of the commissioner s mail to the house of representatives it is taken that he will give considerable attention to legislation for Puerto Rico Mr Degetau is a citizen of the island and speaks and writes English

A peculiar question has arisen as to whether Mr Degetau becomes commissioner at once or comes in like the newly elected members of congress on March 4 next The law provided for an election in Puerto Rico last month and every two years thereafter the apparent intention being to have the commissioner begin his service with members of congress on the succeeding March 4 But there is no provision postponing the term to March 4 and he probably will be entitled to official recognition and salary as soon as he reports.

STRATTON'S INDEPENDENCE

London Shareholders Had a Stormy Meeting, Denouncing Management.

London Dec 7—A meeting of people interested in Stratton s Independence mine today attracted an immense attendance of shareholders who passed a vote of no confidence in the board of directors after one of the stormiest city meetings on record

The whole meeting was disorderly The directors were hissed and hooted and the words scandalous and 'disgraceful and accusations of fraud were hurled broadcast

The Earl of Chesterfield, who presided read a cablegram from John Hays Hammond the American engineer asking him to announce to the meeting that Mr Hammond s connection with the mine dated from after the shortage of ore reserves was discovered His lordship proceeded to say that a cable message received from State Geologist Rickard of Colorado dated Oct 20 conveyed the first intimation of serious misrepresentation on the part of the old management in regard to the value of ores This was not published because it was vague and incomplete but had the directors had any conception of the foreshadowed discrepancy of $12 000 000 as shown in the subsequent report of Mr Hammond dated Nov 24 they would certainly have made Mr Rickard s statement public

Mr Rickard made a personal explanation at the meeting and a long and animated discussion marked by wild disorder and much execration followed Chaos reigned amidst which the great mass of shareholders left Lord Chesterfield then declared the report carried though the meeting had previously voted to postpone its consideration for two months.

NEWS NOTES FROM PUEBLO

Jury in Simpson Case Returned a Verdict of Guilty.

SANTA FE RAILROAD STRIKE

Officials Prepared to Act If Trouble Is Extended—New Traction and Lighting Company

Pueblo Bureau
Colorado Springs Gazette

Pueblo Dec —After leaving a note saying that he was tired of existence and wanted to end it John Cox 33 years old swallowed a large quantity of carbolic acid and died soon after The suicide occurred in a North Union avenue lodging house at about 4 30 this afternoon The lodging house keeper broke open the door at 5 o clock and found the body Cox had recently been employed as a section hand on the Rio Grande Nothing is known here as to his family

In the Associated Press dispatch s this morning appeared a strike of telegraphers which had been inaugurated on the Gulf division of the Santa Fe railroad It was stated in the dispatch that the strike was expected to extend to other divisions of the road and also to other branches of the railroad employes over the country The head offices of the Santa Fe company here today received instructions from the general offices instructing the superintendent as to the course he should pursue in case the strike extended to this division He is instructed to immediately discharge all men connected with every department of the railroad who are not absolutely necessary to the operation of the road Inquiries among the railroad men here show that no instructions have so far been received regarding the extension of the strike to this division of the road Should the employes here strike out of sympathy it will necessarily throw a large number of men out of employment both in the mechanical and clerical forces of the immense corporation

Simpson Found Guilty

The jury in the case of S R Simpson who has been on trial in the district court for the past three days on a charge of perjury returned a verdict this evening finding the defendant guilty Simpson was immediately taken into custody by the sheriff and is tonight in the county jail. He was arrested months ago but has been out on bond The case was tried before Judge M S Bailey of Canon City and the prominence of the defendant drew crowds to the court room every day of the trial All of today was taken up with the arguments of the attorneys there being two on each side At 4 15 o clock the case was given to the jury and at 6 15 they returned a verdict. Simpson was alleged to have perjured himself in giving testimony in a case before Justice Low in May, 1898 the case being a suit brought by T J Cochran against Mrs Celestia Peck The prosecution claimed that Simpson brought the suit in Cochran s name without the latter s consent and Cochran who lives at Iowa City Iowa came to Pueblo to testify in the case so he claimed on the witness stand He also alleged that the bringing of the suit was part of a scheme concocted by Simpson to defraud Mrs Beck

Company Re Organized

Articles of incorporation of the Pueblo Traction and Lighting company were filed with the county clerk today and with the birth of the new company the old Pueblo Traction and Electric company goes out of existence The new incorporation is to enable the directors of the company to increase their bonded issue as the issue of the old company was nearly all exhausted The officers of the new company are the same as those of the old one The capital stock of the new organization is placed at $1 500 000 divided into 15 000 shares of $100 a share Under the new plan the company will be enabled to make a great many improvements which they have planned for some time

Trustees of the creditors and stockholders of the Canon City Coal company today filed a document with the county clerk which transfers the property of the company to the Cherokee Coal and Mining company of Kansas The Canon City company s charter expired in 1898 and as the Santa Fe Railroad company owns most of the stock of both the Canon City and Cherokee company the transfer is merely to close up the affairs of the former

The annual poultry exhibit of the Southern Colorado Poultry association will be given in Pueblo January 15 It has been planned to make the exhibit on a larger and grander scale than ever known before

Rummage Sale

In a store room on North Union avenue today began the rummage sale inaugurated by the charitable ladies of Pueblo to raise funds for the suffering people of Galveston Articles of all kinds were offered for sale and buyers were plenty The sale will continue tomorrow and from the successful opening today it is anticipated that a large sum will be realized for the good cause

Frank C Buckley the Colorado and Southern conductor who died a few days ago from injuries received in a railroad accident was buried today from the Fountain Presbyterian church The pall bearers were all railroad men and the funeral was under the auspices of the Order of Railroad Conductors

G A R Officers

Butler Post No 9 G A R held its annual election of officers tonight and E H Stambaugh was elected post commander John E Page and T R Hurd were elected delegates to the department encampment which will be held next May

Frank A Birdsall 18 years of age and one of the best known young men in Pueblo, died at the home of his parents on Eaton avenue this afternoon Deceased was one of the prominent young men of the city being especially well known in Bessemer

An open meeting of the Women s club will be held at their rooms in the Masonic Temple tomorrow afternoon It will be in charge of the musical department of the club and the programme will consist of vocal and instrumental music.

COLOMBIA REVOLUTION

Kingston Jamaica Dec 7—The British steamer Louisianan from Colon today reports that the British gunboat Pheasant arrived at Panama recently and left that port without any important incident. The Pheasant was sent to investigate the seizure of the British steamer Taboga by the Colombian authorities It is believed that the Taboga matter will be settled up by the payment of an indemnity to the Pacific Navigation company owners of the vessel

Fighting is proceeding at Buena Ventura The Colombian government has not succeeded in dislodging the rebels at that port, who still hold strong positions.

THE HAGUE AND LISBON

Portuguese and Dutch Ministers Have Been Recalled.

DIFFERENCE MAY BE SERIOUS

Trouble Believed to Have Arisen Over The Exequatur to Dutch Consul At Lourenzo Marques.

Lisbon Dec 7—The minister of The Netherlands to Portugal and the Portuguese minister at The Hague have left their respective posts It is believed that a difference has arisen on the subject of the exequatur to the Dutch consul at Lorenzo Marquez which the Portuguese government has withdrawn

Tension between Portugal and Holland appears to have been emphasized perhaps not altogether unintentionally by the peculiar warmth of King Charles toast to Queen Victoria at the banquet given yesterday evening at the royal palace to Vice Admiral Sir Harry Holdsworth Rawson and the officers of the British fleet now in the river Tagus and by the telegram which the king afterwards dispatched to Victoria thanking her majesty for sending the fleet and for the friendship thus demonstrated

I beg to record I telegraphed the king— my great satisfaction at the frank and loyal alliance uniting England and Portugal

In the course of his speech when he toasted Queen Victoria the king said among other things

England has often shared the efforts and glories of Portugal Our mutual friendship and close alliance are strengthened by history and the blood shed together in causes which have always been just

Admiral Rawson replied that the words of the king harmonized with the thoughts of the government and people of Great Britain

Madrid Dec 7—The Imparcial says it considers the rupture of relations between Holland and Portugal to be very serious It adds that it was due to the intrigues of Great Britain further asserting that Portugal is now under the tutelage of Lord Salisbury.

Observers think that the speech and telegram constitute an intimation to the world that Portugal can count on strong support if necessary

TWENTY-ONE MINERS WERE SUFFOCATED AT BUTTE

Butte Mont Dec —What came very nearly being the largest mining disaster in the history of the Butte camp occurred today Fortunately no lives were lost but 21 unconscious and half suffocated miners were hauled to the surface by ropes from the Bell mine and laid in rows while nearly all the doctors in the city worked over them and by means of artificial respiration and strong stimulants finally succeeded in reviving all the victims

A month ago fire broke out in the Bell shaft one of the Anaconda company s properties and so far all attempts to extinguish it have proved unavailing A force of men were put to work today in the air shaft [illegible] feet deep with the intention of drifting to head off the fire in the main shaft. At noon the men failed to come to the surface and a second gang was sent down to investigate The second party also failed to return and a third shift was sent below Many of the third shift were overcome by sulphurous gases before a fourth party protected with smoke helmets reached the spot. The unconscious men were passed up ladders one at a time with great difficulty until all were taken to the surface It is not believed that any of the victims will sustain permanent injury

MORRISON TRIAL

Defendant Proved Unexpectedly Strong Witness

She Declared that Mrs Castle Had Begun the Fight—Testimony Not Shaken by Cross Examination.

Eldorado Kan Dec 7—Jessie Morrison today took the stand in her own defense and in a quiet, determined manner told minutely of her relations with Olin Castle before his marriage and as calmly pictured the scene at the Castle house during the bloody rough and tumble fight with Mrs. Castle She proved an unexpectedly strong witness.

Miss Morrison approached the witness chair pale and trembling and began her testimony with an effort As she proceeded she gained confidence and related her story without hesitation She denied most of the damaging testimony adduced by the prosecution She flatly denied many of the statements made on the stand by Olin Castle and declared that he had tried to make Mrs Castle jealous, and that Mrs Castle had flaunted her husband s acts in her face On the day of the tragedy she declared Mrs. Castle had called her into the house as she was passing had accused Miss Morrison of trying to separate her and Castle and when she denied it called her a liar Mrs Castle had the witness declared emphatically begun the fight slashing her with a razor again and again and compelling the defendant to attack her antagonist in self defense

During her thrilling recital of the two women rolling over one another on the floor in their combat the spectators riveted their eyes upon Miss Morrison In all her testimony Miss Morrison was direct and positive never once did she flinch and at only one time during the cross examination did she shed a tear It had been feared even by the defense that she would break down during cross examination The state did not succeed in making her contradict any of the telling points in her testimony

PRESBYTERIAN CREED.

Washington Dec —The Presbyterian committee of sixteen today voted seriatim on the five propositions submitted by various members having for their object the revision of or a supplemental statement to the confession of faith

The outcome of the voting and accompanying discussion was the formation of a combined resolution embodying as nearly as possible the individual views of the members The vote on this proposition will be taken tomorrow The proposition adopted by the committee at this session will be subjected to alteration and change at a subsequent meeting to be held before the general assembly convenes in May

MILITARY ACADEMY.

Washington Dec 7—The military academy appropriation bill will be taken up by the house committee on military affairs next Tuesday At that time also it is expected that the resolution asking the secretary of war to investigate the alleged hazing of Cadet Booz At West Point will be favorably reported as Chairman Hull says the secretary of war probably has instituted an inquiry on his own account and there is no objection to expressing the wish of the house that the inquiry shall be made.

A strike is reported to have been made on the Galena hill property of the Colonial Dames company the ore resembling that of the Sunshine claim, 500 feet distant.

NEW MEXICO RAILROAD

Denver Dec —A special to the Republican from Santa Fe N M says

The Santa Fe Albuquerque and Pacific railroad company this afternoon filed incorporation papers at the office of the territorial secretary

The capital stock is $2 250 000 Altogether 150 miles of road is to be constructed It is to run from Santa Fe to Albuquerque connecting with the Denver & Rio Grande at San Pedro A branch line is to be constructed commencing ten miles south of San Pedro to connect with the proposed extension of the Chicago Rock Island & Pacific road and the El Paso & Northeastern railroad The incorporators and directors are W S Hopewell of Hillsboro W H Andrews of Pittsburg Pa J T McLaughlin of San Pedro Joseph E Saint of Albuquerque and Charles W Dudrow of Santa Fe It is said that the Rock Island and Denver & Rio Grande are behind the project.

Madonna Mary—A Sketch of Early Christian Art.

The fish, the vine the palm the lamb with such simple symbols did the early Christian artists remain content, content perforce too that these simple forms should remain below ground in that perilous time when the form of a fish traced in the sand was crime enough to hurry its perpetrator to the arena and martyrdom All these figures found on the sarcophagi were meant to express the Christ but with the growth of the Christian religion came the desire to typify the chaste, the beautiful, the compassionate; and who more fitted to stand for these, as well as all the higher attributes, than Mary the mother? On the sarcophagi and in the catacombs, as early as the fourth century are seen the figure of a woman s and in proportions with hands extended in benediction or occupied with a book Fragments of glass have been found also in Christian tombs bearing a similar figure in colors and beneath it the word Maria leaving no doubt as to the identity of the figure It is curious in tracing the history of the Madonna to see in the early stages of Christian art how many opposed principles were welded together in her She first bore the characteristics of the great Diana of Ephesus goddess of chastity New ideas awoke with regard to the duties and moral qualities of her who was the ideal of what all womenkind should be and through the struggle with classical prejudice and Hebrew ideas of the duties of woman Mary the Mother came and the ennobler not only of her own sex but of the whole human race

The Nestorians believed that Mary was parent of the man but not of the God and that the title of Mother of God was improperly—implied But the first council of Ephesus condemned the Nestorians as heretics and henceforth the Madonna and child became the expression of faith The pendulum swung to the other extreme and the group of the Madonna and Infant Jesus was now seen everywhere Each house had its representation it was introduced into the furniture, it was embroidered on the clothes.—(N Hudson Moore, in Modern Culture for December

ROLAND REED'S CONDITION.

New York Dec. 7—A report from St Luke s hospital late tonight said that physicians were performing an operation upon the actor Roland Reed, and that his condition was critical.

This is the third operation which the actor has undergone.

NEWS TOPICS FROM DENVER

Golf Champion Vardon on Unfamiliar Grounds.

TAX LEVY FOR COMING YEAR

County Levy 13 Mills and City 15 3 Mills—Major Halford In the City —The Carter Museum

Denver Bureau
Colorado Springs Gazette

Denver Dec 7—Harry Vardon the world's champion golf player was defeated this morning at the Overland links in a game with Walter Fairbanks who played with a handicap of one half to a hole and won with a score of 3 up and 4 to play

The following is the score First round Vardon 41 Fairbanks 4[illegible] second round Vardon 34 Fairbanks 39 total Vardon 75 Fairbanks 81 The fact that Vardon was not used to the ground was given as a reason of his defeat

The county commissioners this morning completed their levy for 1901 The total levy amounts to 13 mills on the dollar with a poll tax of $1 a head The appropriations for the coming year by the board amounts to $613 000 This does not include the school funds The levy for the city is 15 3 10 mills on the dollar It is on account of this double levy that a bill is being prepared to be introduced into the next legislature which will unite the two corporate bodies

Major E W Halford who was President Harrison's private secretary is in the city today He is on his way to Manila where he will serve as a paymaster in the United States army His many friends in Denver tendered him a reception at the Y M C A rooms this afternoon

Two tailor shops were burglarized last night in much the same manner as the two cigar stores were last week The losses are Mortz Tailoring Co 1648 Tremont street $150 J Blue Tailoring Co 1862 Champa street $100

D S Grant of Berkeley has addressed a letter to the teachers of the Alcott school in which he protests against his children being dismissed from the school because they are not vaccinated The doctor is a Christian Scientist and in his letter calls the state board of health a lot of medical guessers

Election Expenses

The state central committees of the different parties have filed their expense account with the secretary of state The Republicans spent $[illegible] the Democrats $16 [illegible]65 the Prohibitionists $401 [illegible] T J Maloney as chairman of the Maloneyites spent $[illegible]

Samuel Mason whose left foot was cut off last Saturday night by a tramway car is in a very critical condition at the county hospital

James Shafer was today acquitted of the charge of helping to rob the Cass & Doyle gambling house last October Shafer's defense was that he was so drunk that night he could not have committed the deed He brought in four witnesses to prove his statement One by one every person arrested for the many holdups that occurred previous to the election is being acquitted

Death of Louis Anfenger

Louis Anfenger one of Denver's most esteemed citizens died this morning at his home 2900 Champa street Nervous prostration and heart disease caused his death He was [illegible] years old and has been connected with Colorado's interests ever since coming to the state in 1872 It was largely through his influence that Gov Waite did not order the militia to fire during the city hall controversy The funeral will be held at his residence Sunday afternoon and will be conducted by the many secret orders to which he belongs The interment will be at Fairmount.

Carter Museum

An agreement has been reached between Mayor Johnson for the city and the board of directors for the Carter museum whereby the city will help erect a suitable building in the City park for the exhibit and will also also help retain the exhibit The building is to cost not less than $65 000 and the city is not to be responsible for any sum exceeding the special levy of one half mill on the dollar At the expiration of the museum charter the building shall be surrendered to the city and the collection be retained by the museum association Immediately after signing this agreement Mayor Johnson signed the tax levy as recommended for 1901 In the incorporation papers filed the exhibit will be known as The Colorado Museum of Natural History

The amount of money collected from brand fees during the year ending December 1 was $158 4

Found a Diamond

A large solitaire diamond was found by one of the employes of the state capital building yesterday It is supposed the gem was lost by some one attending the Slaves ball Richard Kelt found the stone

Mary R. Strayer was arrested last night by the United States marshal on the charge of perjury in connection with the pension papers issued for her husband

Many of the Bryan and Stevenson clubs of the city have decided to continue their organizations under different names The idea is to retain the permanent organization in order that effective work may be accomplished at the coming spring election

Sheriff Robert W Jones is contemplating starting a detective office of his own the first of the year It is said Detective De Lue will be the chief

There is a growing rivalry between the city and county officers this together with the fact that so many robbers have gone unmolested during the past year has caused the sheriff to add this force to his department

Overland Track Leased

Edward Gaylord a local horseman has leased the Overland race track until 1903 and is planning to hold some of the finest racing ever [illegible] held in the west Already [illegible] are being made for the meet [illegible] which will be held from June 1 to Sept 1 [illegible]

The people of Denver are not going to give up the idea of having a suitable [illegible] Already petitions are being filed with the city council asking that body draft an amendment conforming to the ideas as laid down by the supreme court and allow the people to vote on it at the election next spring

GRAND JUNCTION

DR ELDRIDGE HAS AN UNUSUAL TROPHY FROM ALASKA

Sugar Plant Will Double Its Capacity and Increase the Price Paid for Beets—Honey

Special to the Gazette.

Grand Junction Dec 7—Mr Fred Gordon who has spent the past six months at Nome has returned to this city to spend the winter He brought back with him from his trip to the far north many curiosities which were gathered in that country among them being the skull of a [illegible] Indian chief This ghastly relic Mr Gordon presented to Dr Edward F Eldridge The fact that it is the skull of a chief was evident from the implements found deposited with the remains which consisted of weapons ornaments etc which are buried only with chiefs The relic was found on the island of Nunivak in the Bering sea The doctor says that the skull is that of a powerful man of at least 75 years old at the time of his death It is in a remarkable state of preservation and illustrates in a most striking manner by comparison the injurious effects of the abuse of the teeth by civilized people which frequently results in premature decay The teeth of this savage although at an advanced age are perfect articulating with the utmost precision

The citizens of this city are jubilant over the news from Denver that the plant of the Colorado Sugar Manufacturing company will remain here It has been sold to a stock company with George E Nagle of Cheyenne president Dr H M Barnett Cheyenne vice president J R McKinnie Colorado Springs treasurer and J F McFarland of this city secretary and manager Under the new management the plant will double its capacity They have given notice already to the growers that the price of beets will be raised 20 per cent for next season's crop This will induce many more to plant beets another year and at this time it looks fair for a bountiful harvest and a large acreage for 1901

Manager John F Moore of the Fruit Growers association shipped two carloads of honey from this city to a Kansas City commission house the fore part of the week Mesa county claims to be the banner county of the state for the production of honey This is a profitable industry and is growing rapidly in the western slope Scarcely a fruit grower or ranchman can now be found but what has become interested in the keeping of bees as a money-making investment

The Public Library

Last summer Andrew Carnegie gave the Woman's club of this city $5 000 for the building of a public library The city council has agreed to maintain the same when completed and in operation With this end in view the board of managers of the organization let the contract yesterday afternoon for the erection of the new building for the library on Seventh street Contractor J L Stull a local man secured the contract his bid being $4 696 The building will be started at once and is to be completed by April 1 It will be fireproof and provided with all modern conveniences for the public's benefit

DID NOT CURE

But Greatly Helped by Change of Food

A lady in Harrisburg O is frank enough to say that while she has been helped she was not entirely cured in the change of food and taking up Grape Nuts food She says she began eating rich and highly seasoned food when she was young and followed it until she set up a bad stomach trouble with severe attacks of nervous sick headache

Finally rheumatism of the joints set in and now some of her joints are dislocated by the heavy deposits forming about them and pushing them out of place so that she is almost helpless Her nervous system was wrecked and the optic nerve affected so that she could not read without bringing on nervous prostration and insomnia that would last two or three nights

"Last fall I heard of and commenced the use of Grape Nuts as a food It has since been both food and medicine to me, for I have taken very little medicine since I began to use it After 10 months I find a great improvement in my brain and nerve power am no longer troubled with sleeplessness I suffer very much less with my rheumatism and can read several hours a day one day after the other and sleep well by night

I am by no means entirely cured of rheumatism but I have been made so much better by the use of Grape Nuts food that I am sincerely thankful for it" This name will be furnished by the Postum Cereal Co Ltd Battle Creek Mich

THE NEWS OF CRIPPLE CREEK

FLORENCE

Special to the Gazette

Florence Dec 7—In another week the work of placing the electric light wires in the Union mill will be completed Throughout the entire buildings there will be five miles of wire six arc lamps and 8[illegible] incandescent lights The power to these will be furnished by a 250 kilowatt generator which is equal to 3[illegible] horse power

Yesterday while George Hickham conductor on one of the Rio Grande switch trains was returning on his wheel from the Rock Island hotel to his work and as he was going up Pike's Peak avenue a loose horse belonging to J W Pape came tearing down the avenue knocking Mr Hickham off his wheel rendering him unconscious He was carried to the office of a physician and remained unconscious several minutes.

After months of hard labor in developing the Smith & Cowan coal mine near Williamsburg is now in fine working shape and everything points to a good winter's run Although the mine is not thoroughly opened still employment is afforded to about 60 men The coal vein is from four to five feet thick and is easily mined The machinery that is used is capable of working a mine of greatly increased output the cable being 1 000 feet long but it will take many years before the drift is driven that far The production is at present going to Cripple Creek and Leadville and some of it is being used by the oil companies at their wells here Outside capital is becoming interested and it is said that negotiations for a sale are being made

ELKTON

Special to the Gazette

Elkton Dec 7—The Elkton Mercantile company which purchased the Colorado Trading and Transfer company's interests at this point has filed articles of incorporation with the secretary of state The company is capitalized at $10 000

A building boom has struck Elkton and the fine weather is greatly assisting the builders Many new cottages are springing up in the northern part of town An addition is being erected to meet the growing business of the postoffice The heavy timbers comprising the frame work of the Elkton shaft house are in place and the coverings of corrugated iron will soon be put in The big ore house is completed and the engine of the mine is under cover

Thomas Michaels the local grocery man left this afternoon for Colorado Springs

Samuel Hayden blacksmith at the Elkton mine, returned yesterday from Colorado Springs where he spent a week with his family

NEWS AND NOTES OF MANITOU

The Ladies Aid society of the Congregational church gave a reception at the new parsonage on Pawnee avenue which was in the nature of a house warming. The affair occupied the whole of yesterday afternoon and evening and a good time was enjoyed by all who were present.

Mr H R Penfield the real estate man has moved his office into the building east of Grant's Curio store on Manitou avenue.

Miss Maud Hubbard will open a studio in the Williams building on Manitou Avenue in the near future.

Miss Scott who has been in Manitou since last spring has returned to her home in Des Moines Ia.

Mr and Mrs W A Davis have returned home after a prolonged absence in Detroit Mich. Mr Davis is the proprietor of the curio store in the soda spring pavilion.

Mrs Horter J Preston of Las Animas Colo is visiting her parents Mr and Mrs James who reside in this place.

A very pretty wedding occurred in the Episcopal church Monday evening when Mr Arthur M James and Miss Nellie King were united in the holy bonds of matrimony by the rector Rev Bonnell. The church was prettily decorated. Mr James is employed by the Colorado Midland shops in Colorado City but the bride and groom have taken the Dillon cottage on Ute avenue and will make their home there in the future.

Mr C F Tschudi is spending a few days in Denver.

Mr and Mrs Peterson returned Monday from Minneapolis where they have been for some time.

Mr Brewster of Denver has accepted a position in the Manitou postoffice.

Fred Herberg the tailor was married last Monday night in this city. He left the same night for California for a bridal tour.

Dr Anne Peterson went to Denver yesterday afternoon where she will spend two weeks with friends. She is en route to her home in La Porte Ind.

Mr and Mrs Ferguson and family went to California Thursday where they will spend the winter.

D H Rupp is in Kokomo Colo on a business trip.

Mrs W H Moreland went to Denver last Wednesday for a few days visit with friends.

Mr and Mrs W S Crosby went to Los Angeles Wednesday to spend the winter.

Mr W H Moreland returned Thursday night from a business trip to Denver and Central City.

Amusements

THE BELLE OF NEW YORK TONIGHT

The announcement that "The Belle of New York" with most of the original cast after its two years run in London under the direction of Mr George W Lederer, is to appear at the opera house this evening is enough to turn the eyes of a horde of playgoers to the theater. It is worth while to narrate some of the remarkable things accomplished by this peculiarly fortunate play. First of all it opened at the Casino as a success. Its tour through the United States was both an artistic and financial success. It was sent to London, where it began a career which will never be forgotten. In a single night it leaped into fame. It really turned London topsy turvy. Its success continued until it has piled up a record of over 3,000 performances in New York London South Africa and Australia. At the Shaftesbury theater in London alone it was played 697 times making a record exceeded only by Gilbert and Sullivan's "Pinafore." It really set the fashion of musical comedy in England. Having had a most successful return engagement recently at the Casino its original home, Manager Lederer has consented to send this world's record company out for a limited tour. Miss Beulah Dodge who resembles Miss Edna May and who is also a chum of Miss May's will have the role of the pretty Salvation lassie and it is safe to predict that Miss Dodge will be an agreeable surprise to the theater goers of this city. She possesses a rich voice is pretty and gives a promise of making a new record as a Salvation lassie the role made so famous by Miss May. Among the other principals are Ed J Connelly Joseph Kane George Tallman Arthur Deagon James Darling E S Torr Mae Sailor Erminie Earle Louise Williard La Belle Dazie and a most shapely and beautiful chorus.

FOR HER SAKE

Russell & Holland is the firm name of the amusement company which produced the Russo-Siberian play "For Her Sake" a four-act melo-dramatic creation said to embody many original features. The piece tells the story of a Russian nobleman whose love for a serf girl engenders a series of plots of the intensely dramatic quality which these Siberian plays afford. The heavy in the play is a member of the czar's secret police and at the same time a nihilist. The play will be seen at the opera house Monday evening.

BEACH AND BOWERS MINSTRELS

Beach & Bowers big minstrels are booked to appear at the opera house next Wednesday evening. The Leadville Herald says: "Although 'S R O' was not displayed last night at the opera house Beach & Bowers were greeted with a fair sized audience on their initial performance in Leadville, and from the rise to the fall of the curtain was one continued round of applause. And it was rightfully earned as there is not a 'stick' in the entire company. The jokes are all new and the solos rendered by the different members were the best that had been heard in Leadville in a long while. To mention each one separately is not necessary, suffice it to say that those who witnessed last night's performance were given a treat and one that will long be remembered."

WAGNER LECTURES

A large advance sale for Mr Goldmark's lectures on the Wagner music dramas guarantees one of the largest audiences for next Tuesday night that has yet assembled in Perkins hall. The desire has frequently been expressed by many lovers of music and literature in this city to have these two music dramas "Tristan and Isolde" and "Parsifal" explained and musically illustrated. Although Tristan was written nearly half a century ago it took nearly 30 years owing to the difficulty of the work to become sufficiently popular for production in the majority of opera houses. It is well known that Parsifal can only be heard by those who make a special journey to Bayreuth as Wagner reserved the right of production for this Bavarian town during the life of the copyright. Tickets are now on sale at the Hext Music Co.

DR. ELLISON'S
SULPHUR COUGH CURE

Being the doctor's residence here people have often called to secure a cough medicine. Of late months these requests have been so numerous that he has decided to supply all who call at the office Dr Ellison's Sulphur Cough Cure at 50 cents a bottle. This remedy has long been used by the doctor in his practice for the cough incident to consumption asthma bronchitis coughs colds, hoarseness sore throat, whooping cough influenza etc. It will not dry up a cough or cold but aids nature in throwing off the poisonous mucus produced from diseased lungs or a cold heals the membrane and restores nature to a healthy condition. It is prompt in its action and can be depended upon as a remedy of unusual merit and absolutely harmless. There is no morphine opium or injurious drug in the composition of this Sulphur Cough Cure. In croup and whooping cough it liquifies the tough tenacious mucus and aids its expulsion from the system. No family should be without it. SPECIAL NOTICE—A 50 cent bottle contains three times the quantity of any other 25 cent cough medicine on the market and a half more than any 50-cent bottle. Office 24 North Tejon street (over Craigue's grocery store).

BIDS FOR WAR SHIPS

Five New Battleships and Six Armored Cruisers Authorized.

THE FINEST OF THEIR CLASS

Armor Controversy and Other Problems Caused Delay—Equipment of the Vessels.

Washington Dec 7—Bids were opened at the navy department for the construction of five new battleships and six armored cruisers aggregating a total displacement of 140,000 tons and comprising the largest consignment of material for the navy ever contracted for at a single bidding.

The three battleships authorized by the act of March 1899 were never contracted for owing to delays in the procurement of armor and in the completion of designs and controversy as to whether the new superimposed turret should be used in their construction. Inability to reach a satisfactory conclusion in regard to the latter delayed construction of the three armored cruisers authorized by the same act. These plans have been adjusted.

The Battleships

The five new battleships namely the Pennsylvania New Jersey Georgia Virginia and Rhode Island are divided into two classes to compromise upon the controversy as to their turret systems. Three are to be sheathed and coppered and will carry superimposed turrets the other two are to be unsheathed vessels having the quadrilateral arrangement of eight inch turrets. To meet the contingency that the bids may be in excess of the authorized cost the bidders were however invited to submit plans in each case for both sheathed and unsheathed ships.

The sheathed vessels are to be of 15,000 tons displacement with a length of 435 feet breadth of 76 feet 10 inches and greatest draught of [illegible]. The unsheathed ships are slightly smaller and on the same length are 2½ inches narrower and 400 tons less displacement. Both classes of battleships will compare with any in the world not only afloat but projected for they will have a speed of at least 19 knots which is expected to run up to 19½ a high speed for a battleship which will be maintained by twin screw engines of 19,000 horse power supplied by 24 water tube boilers.

Difference in Turrets

The radical difference in the battleships to the outward appearance will lie in the turrets. Each ship will carry four 12 inch guns. These are of the extraordinary length of 40 calibers or 20 feet in the bore of the new type just turned out by the ordnance bureau and superior in efficiency to any 12-inch gun in the world and at least equal to the 13 inch guns which have marked the maximum caliber in the American navy. In the three sheathed vessels a pair of eight inch guns will be mounted on the top of each of the 12 inch turrets. Four other eight inch guns will be distributed in two turrets amidships on these two vessels.

The unsheathed vessels will have all of their eight eight inch guns mounted in four independent turrets one placed at each corner of the oblong superstructure. Both classes of vessels sheathed and unsheathed will have a broadside of 12 six inch rapid fire guns on the main deck besides 12 14 pounders and 12 two pounders and a number of automatic guns making the battery more formidable than any afloat as ability to concentrate fire and the weight of metal is concerned.

In the matter of defensive power the battleships of both classes are unsurpassed carrying an eight foot wide water line belt of armor 11 inches thick over the vitals of the ship tapering to four inches at the ends. The six inch guns will be placed behind the protection of six inches of solid hardened steel and the turrets will vary from 10 to 11 inches in thickness. A curved turtle back protective deck and an effective belt all around the water line stuffed with cellulose will afford further protection. Electricity will be used in the battleships to a much greater extent than in any other ship afloat and the use of wood will be restricted to the minimum.

Armored Cruisers

The six armored cruisers represent the highest development of the naval constructor's art. Chief Constructor Hichborn has not only managed to design them ships as fleet as any foreign navy can boast but has endowed them with the qualities of battleships at many points. Three of these ships are to be sheathed and three are to be unsheathed. Of a less displacement than the battleships 13,800 tons in the case of the sheathed and 13,400 in the case of the unsheathed cruisers these vessels are still considerably longer being 502 feet on the water line with a breadth of 70 feet and a draught of 26 feet 6 inches.

Quadruple twin-screws of 23,000 horse power supplied by 30 boilers will propel these great ships at a minimum speed of 22 knots per hour and with capacities for 2,000 tons of coal in her bunkers their endurance will surpass that of any similar foreign vessels. Each cruiser will carry four eight inch guns in Hichborn balanced turrets, four six inch guns in sponsons at each corner of the superstructure and 10 six inch broadside guns besides the usual secondary battery.

Six inches of hardened steel will extend in a belt around the ships seven feet six inches broad and the guns in the citadel and superstructure are proportionately protected. A heavy protective deck and cofferdam belt complete the protection.

ACTIVITY IN LUZON

Bands of Rebels Have Been Routed With Considerable Loss by American Scouting Parties

Manila Dec 7—More activity is shown in the operations in northern and southern Luzon. The reports from the former district come in more quickly and telegraphic interruptions are fewer.

Gen Funston with Troop A of the Fourth cavalry and a score of scouts last Thursday encountered a hundred insurgents posted on the opposite bank of the [illegible] river. The Americans charged across the stream and the enemy retreated firing from cover. They left four dead on the field. A native who was captured reported that Fagin a deserter from the Twenty-fourth infantry who has been active with the Filipinos with a party of two [illegible] Lieut [illegible] with 50 men from the Forty-seventh regiment attacked and [illegible] Pulacan. While returning the troops encountered Col Victoria occupying an entrenched position with 30 rifles and 300 bolomen. Lieut Morrow's force charged and drove the enemy from their position it is believed with heavy loss. Preceding the fight the expedition had captured Major Flores and several of his followers.

An engagement is reported to have occurred near San Roque in which according to natives 50 rebels were killed.

Several minor encounters and captures are also reported. The American casualties have been very slight.

The island of Bohol has recently been the scene of more activity on the part of the insurgents than formerly and a company has been sent to reinforce the battalion stationed there.

The members of the Philippine commission and several military officials will go to Dagupan tomorrow as guests of the railway management. Their families have also been invited. They will return Sunday.

WITH ELABORATE BRAID TRIMMING

This extremely smart gown is of russet brown cloth with a novel braid effect bordering the skirt and covering the blouse. The skirt has an exaggerated flare at the bottom which is very smart and the Aiglon collar and revers of the blouse which are covered with braiding give a thoroughly up-to-date air to the gown.

Heroic Woman at the Siege of Peking

Lady Macdonald Mrs Conger and the other ladies of the legation offered their curtains and portieres for use and the scissors ruthlessly cut up most exquisitely embroidered draperies into sand bags while those who were in charge of the fortifications continually sent messengers asking for more more. One of the mission ladies had just laid in a new supply of table linen and some of the native Christians finding it and knowing whose it was brought it to her. This with all like material was used as were drawn work linen sheets and pillow cases while bolts of rare damask linen were cut up without compunction. In fact all sense of cost and even sense of beauty seemed to be lost in the eager desire to furnish the means of protection to human lives. Besides these beautiful things thus sacrificed there were also used common materials such as old Mongol tents hangings to Sedan chairs and stacks of old Chinese clothing. These were cut out and sometimes sewn by foreign ladies unused to other than delicate work. However the foreign ladies were greatly assisted by the Chinese girls of the mission schools and of the women of the families of native Christians. Of the former there were some 150. Beside the supplies brought from the foreign stores there were great rolls of cotton cloth also of silk and brocade satin from Chinese stores. The Chinese at their funerals wear special garments. Many of these were used the long large sleeves being well suited to the purpose of bag making. It was a continual surprise that new supplies from new sources came in each day as needed.

The housekeeping committee and those who worked in the diet kitchen were particularly hard worked being constantly busy and exhibited an ingenuity in planning and preparing appetizing edibles that was marvelous. The materials were horse flesh (called pony meat) coarse wheat flour and a dark colored rice. These were the staple materials. There was a small quantity of canned meats which was used as an occasional relish. The white rice and all delicacies were reserved for the babies and the sick. One of the missionaries told me she went each day to another part of the legation in constant danger of flying bullets to get a slice of white bread for her sick baby. The woman having the flour baked a loaf each day not for the use of her family but for the sick.

While there were three ladies on the standing committee of housekeeping all the ladies took their turns in looking after the cooking serving table setting etc. As there were 70 in this family they were divided into three messes. And it was necessary to have three of each of the meals. As the dining room was also living and sleeping room it required much work to keep it in presentable condition. One of the hardest things to bear was the utter impossibility of having quiet. There were times when it was unsafe for anyone to be outside the building and all work had to be done with a large number in the room. Outside was the roar of artillery. Inside three busy sewing machines and women and children and servants at work besides all the men not required outside on the fortifications or at the mill. This constant noise—and impossibility to be alone—was more wearing upon the nervous system than any amount of work.—(Alice Hamilton Rich in Leslie's Weekly)

A Timely Note of Warning

Obituaries of the Democratic party are being written today by some Democrats and by many Republicans. This is a performance which the country saw more than once in the past. It took place immediately after the election of 1896 and also after that of 1888. Possibly it will be repeated in 1906 and 2000 and many times between now and then. The Democratic party survived the Whig tidal wave of 1840 and buried the Whig party not long afterward. It rallied after the Republican avalanches of 1864 and 1872. Each of the two great parties of today is as near to being immortal as any human organization or institution can be. Each has reason, a discipline and general elements of persistence not possessed by any of the great parties of the past. The Democracy will discard its recent follies will extirpate its recent leaders and will adjust itself to the requirements of the time. The result of the election of 1904 will not be known until the ballots in that contest are counted. It will be a contest far different from that of 1900 and probably its opposite in many important respects.—(Charles M Harvey in Leslie's Weekly)

WE ARE READY FOR CHRISTMAS!
ARE YOU?

It is the part of wisdom not to delay your preparations until the last few days. Better begin now, when you can do it more leisurely. The whole store has caught the Holiday spirit, and you are welcome to inspect our array of useful and beautiful gifts, such as is seldom your good fortune to see. It's a stock to enlist the interest of any taste and satisfy the demand of any pocketbook.

What you select now will be held for later delivery if you wish.

We have everything that's new, beautiful and excellent in

Men's and Boys' Clothing and Furnishings

and our present prices place these things within reach of the most modest purse.

MEN'S HOUSE COATS AND SMOKING JACKETS in beautiful patterns plain and fancy trimmed at $5 00 $6 50 $7 50 $8 50 and up to $10 00

MEN'S BATH ROBES AND LOUNGING GOWNS $3 50 $4 50 and $6 00

NIGHT ROBES at 50c 60c 75c $1 00 and $1 25 each. You will be surprised to find so much elegance crowded in such small prices.

SILK MUFFLERS 50c to $2 50. Truly a fine assortment of beautiful patterns and shapes including the Reefer and Oxford shapes all colorings.

DRESS AND STREET GLOVES 50c 75c $1 00 and up to $2 25 pair

SILK HANDKERCHIEFS 25c to $1 50 each. Beautiful designs

UMBRELLAS PLAIN OR MOUNTED in great variety of style and all at reasonable prices

HOLIDAY NECKWEAR from 25c to $2 00 all the newest effects all shapes and colorings

PLAIN AND FANCY HOSIERY AND FANCY SILK SUSPENDERS all at prices calculated to surprise and please you

COLORED SHIRTS $1 00 TO $1 50—MONARCH.

If you want your Christmas money to reach a long way, buy presents here. We give back more change than any house in Colorado Springs.

How Beecher Gave an Author a Start.

Few indeed there are of those interested in American literature who will not feel a sense of personal loss in the death of Charles Dudley Warner. He was an inspiration to more young Americans than will ever be recorded to his credit. Who has not felt the glow of his cheering good nature while reading those charmingly simple sketches "My Summer in a Garden" first published in the course of his newspaper service.

This again emphasizes the close alliance between newspaper work and literary effort for Charles Dudley Warner from his editorial work attained a prominence in American literature. An interesting story is told of how his newspaper sketches were gathered together for a book and refused by a number of leading publishers. Henry Ward Beecher then in his prime, read them and remarked 'We will see about it.' He wrote a preface for the sketches and sent them to a publisher and an edition of 10,000 was soon exhausted.

Mr Warner was a neighbor and friend of Harriet Beecher Stowe and through her met her distinguished brother. He was also a fellow townsman of Mark Twain. Personally Mr Warner was a charming man and never can I forget his kind words, when he remarked in reference to 'The National Magazine' 'Keep right at it, you are on the right track and have the right purposes. Remember it is a fight—always a fight.' And then came the story of what Henry Ward Beecher had told Charles Dudley Warner: "You have the genuine stuff in you. You only need to be born and I will be present at your birth. Give me those newspaper slips and I will write a preface for them and the publishers will take them from me if not from you." Mr Beecher was indeed present at the birth and Charles Dudley Werner never forgot the great preacher for his kindness.—(In The National Magazine for November.

LONG STOCKINGS WOULD HOLD MORE.

Sister—When do you want mamma to put you in long trousers?
Bobby—'Not till after Christmas.'

NEWSPAPERARCHIVE

COLORADO SPRINGS GAZETTE

Published Every Day in the Year

Sixty Cents a Month Seven Dollars a Year

The Gazette is on sale at the

Auditorium Annex .... Chicago

Waldorf Hotel .... New York

And is on file at the

Fifth Avenue Hotel. .... New York

The Gazette is delivered to regular subscribers by early morning carriers in Denver, Boulder, Cripple Creek Victor Pueblo Canon City Florence Colorado Springs Manitou Colorado City and Broadmoor, and can be obtained from the newsboys and at the news-stands in each of the above places

THE GAZETTE HAS MORE THAN DOUBLE THE CIRCULATION OF ANY OTHER DAILY PAPER PUBLISHED IN COLORADO OUTSIDE OF DENVER

IT HAS 50 PER CENT GREATER CIRCULATION IN COLORADO SPRINGS AND VICINITY THAN ANY OTHER DAILY PAPER PUBLISHED IN COLORADO SPRINGS

IT FURNISHES SWORN STATEMENTS OF ITS CIRCULATION TO ADVERTISERS, AND ITS PAID CIRCULATION IS GUARANTEED BY THE ADVERTISER'S GUARANTEE COMPANY OF CHICAGO

THE SUNDAY GAZETTE.

THE Sunday Gazette is the best literary journal and newspaper in the Rocky Mountain region

Because its articles are always timely, interesting bright and written by the best authors Its illustrations illustrate Not one of them is put in to fill space, but each has its purpose, and each is photographed, engraved and printed in the best style of these arts

The regular and special departments editorial, local mining society, schools and churches, theatrical, lodges and labor unions woman's page children's corner, etc are not equaled by any other paper of this state and not surpassed anywhere

Tomorrow's Gazette will contain many attractive and valuable features of special interest

Ellis Meredith furnishes an answer to the articles against capital punishment that have recently appeared in the Gazette Of Mrs Meredith the Durango Democrat (Dave Day's paper) recently said She easily heads the list of her sex in this state as an easy and interesting writer, and it matters not whether the subject be poetical, political personal descriptive or boom, she handles one and all with equal interest and in a way that pleases Her writings are universally read in this state"

In the series of 'Cosmopolitan Colorado Springs,' the fourth article will be devoted to Iowa and will be liberally illustrated with portraits of Judge John Campbell, chief justice of the Colorado supreme court, and other distinguished natives of Iowa who are now citizens of Colorado Springs

The most important social event in the state the past week was undoubtedly the grand ball in Denver of the Slaves of the Silver Serpent. This will form the subject of a special illustrated article in tomorrow's Gazette

Mr. Sidford F. Hamp of the Gazette staff has revised for publication in the Gazette a short story of special merit

There are two features of the Gazette that are deserving of special attention.

One is the absolute cleanness of its news and advertising columns objectionable matter being rigidly excluded from both

The other is the reliability of its news, both local and telegraphic The Gazette is the only paper publishing the complete Associated Press service on week days, and it has exclusive rights to the Associated Press dispatches on Sunday for this city. No other paper can or does print these dispatches in this city on Sunday, and any other news service must necessarily be incomplete and unreliable

KRUEGER IN HOLLAND.

BEFORE the British succeeded in establishing themselves as the leading colonial power of the world, South Africa was Dutch territory and the Boers owe their origin to the Dutch colonists that settled first at Cape Town and were driven farther and farther into the interior by British aggression

Kruegers visit to Holland is like getting back to home folks The people there speak his own language and have already given evidence of their sympathy by sending a war vessel to bring him to Europe from South Africa

It is, however, only sympathy and nothing more practical than Holland will be able to give Krueger at the present time Once it is true, the Dutch disputed with England the title of 'Mistress of the Seas' but that was a long time ago, when South Africa was Dutch and not English territory At the present time Holland could not, even if she would, offer any effective aid to the Boers and her influence in European diplomatic circles is not of a character to warrant the belief of practical results from a Dutch indorsement of Krueger's appeals.

Unlike the empty applause of the French mobs Dutch sympathy is genuine and sincere Holland would be glad to help Krueger if she could, but she cannot, and that is the end of it. Krueger has gone to the one place in the world where he is certain to receive honest sympathy but even there he will not get what he most desires, because he cannot

PARLAIMENT IN SESSION.

PARLIAMENT opened on Monday, but it was not until Thursday that the queen's speech was read and formal business begun The slowness and formality was in striking contrast with the businesslike alacrity of the American congress which met on the same Monday and was already deep in its work before parliament had fairly begun its labors

The present parliament is limited to what we would call an extra session. It is called together to vote money for the war in South Africa, and the queen's brief message explicitly warned it to refrain from other public business

The strength of the Conservative party, fresh from the elections will insure an observance of these instructions and it is doubtful whether the Liberal party w offer any serious opposition to the voting of the money that the government has declared to be necessary There will doubtless be a great deal of criticism of the conduct of the war and a disposition to make the most of what scandals have come to the surface, but there is no considerable number of Englishmen in any party that desires to tie the hands of the government or that would seriously consider a proposal for peace in South Africa on any terms other than the complete conquest of the Boers and their enforced submission to British authority

Under the circumstances parliament is likely to have a short session

For RELIABLE news, read the Gazette

THE METRIC SYSTEM.

THE unanimous vote of the house committee on coinage, weights and measures in favor of Mr Shafroth's bill to establish the metric system in this country will revive interest in the French system of weights and measures which has now been adopted by practically all the civilized countries of the world, with the exception of Great Britain and the United States

The basis of the metric system is a bar of platinum kept in Paris under the care of an international bureau of weights and measures, which is further charged with the duty of constructing and verifying copies of the standard meter for all governments that may desire to have them. Theoretically the length of this meter is one forty-millionth part of the distance around the earth on a meridian, but as no one knows exactly what that distance is, and it is impossible to measure it with absolute accuracy, it was agreed at a congress of representatives of 30 nations in 1874 that the meter standard bar should be the basis of the system without regard to any correspondence with the earth's circumference

Upon this unit of measurement, the meter, which is a little more than 39 1-3 inches in its English equivalent, is built up all other necessary measures and weights The unit of surface, called the are, is a hundred square meters The unit of capacity, the liter, is the cube of one-tenth of a meter, and is equal to a little more than one quart The unit of weight is the gram, which is the weight of a cubic centimeter of distilled water at a temperature of 4 degrees centigrade One thousand grams are equal in weight to about two pounds

There is little practical difficulty in changing our estimates from one system to another The meter is a little longer than our yard the liter is nearly equal to our quart and the kilogram is a little more than two pounds The hectare is two and a half acres, approximately

The most serious inconvenience in the adoption of the new system would arise in land measurement The United States west of and including Ohio is surveyed in sections of one square mile Nearly all real estate is in tracts of ten acres or some multiple or fraction of that quantity Every city lot is measured in feet and only in exceptional cases is there a fraction of a foot included in the measurement. It is practically impossible to change our system of land measurement, and even if we adopt the metric system for many years to come possibly forever we will continue to measure our farms in acres and our city lots in feet In recognition of this difficulty the Shafroth bill provides that the survey of the public lands of the United States shall be continued according to the old system

The main advantages of the metric system are its common use all over the civilized world and its decimal construction, which does away with complex tables and the necessity for difficult arithmetical calculations Under the new system meters and liters are multiplied added and divided as easily as dollars and with it in common use all kinds of business would be simplified and a great many mistakes avoided

It is not the purpose of the Shafroth bill to compel the use of the metric system by the people of the United States It merely directs that it shall be used in the government departments but such use will undoubtedly tend towards bringing about its common use by the people, and the example of the government will be followed by the states and in time by the cities, by large companies and in the end by all the people.

It is a reform that ought to be adopted and if the Shafroth bill receives the approval of congress, a good thing will have been done none too soon

THE HOLIDAY SEASON.

THE Gazette wishes to call especial attention to the holiday advertisements that appear in this number of the Gazette Persons who make their holiday purchases early always secure better results than those who wait until the last moment It is when the stock of Christmas novelties is first unpacked that there exists the best opportunity for finding what one wants and at that time clerks are able to give more time and attention to intending customers The stores are not crowded as they are later on and purchasers have a better opportunity to examine the goods

Enterprising merchants are quick to appreciate the advantages of early advertising, and the Gazette is glad to recommend to its readers those whose advertisements are found in our columns today There is no better place to look for holiday suggestions than in the advertising columns of the Gazette, and those who look after their holiday shopping this week will make no mistake in doing so.

NEW ZEALAND REFORMS.

EVERYONE knows in a more or less definite way that the colony of New Zealand has undertaken some very interesting experiments in social legislation the results of which are being watched with hope or anxiety throughout the civilized world and especially among the English speaking people

In a book recently published by Doubleday, Page & Co entitled In Newest England," Henry Demarest Lloyd sets forth in a most interesting way the reforms there in progress, and the conditions under which they are working

One of the most satisfactory departments of the government is a state life insurance department, which pays taxes like any private company. It does about one half the business in this line in the colony and its profits go to the insured and not to the state Another department is the public trustee, who has very broad duties and authorities and is a general administrator of the estates of minors widows invalids and insane persons

A system of compulsory arbitration is in operation with good results

The minister of public works furnishes employment by a system of contracts directly with the workmen organized into co operative groups Roads are built, public buildings erected and even complicated bridges constructed by this system

A great step has been taken towards the distribution of land among small holdings and the breaking up of large estate. The favorite system of land tenure in New Zealand is the perpetual lease, which according to the statement of the minister of lands has five principal advantages over the system of complete individual ownership. It enables the government to select the occupier, it controls the cultivation and improvement, no transfer can be made without the consent of the state speculation and its result—monopoly—are prevented the area which can be held by anyone is limited

The American states are already indebted to Australia for one very practical political reform the official ballot, and it would be surprising if the success of the social experiments in New Zealand were not followed by a trial of them in this country

There ought to be no objection to the proposal to send a United States government vessel to transport Boer immigrants to this country The United States would be glad to receive them and under the circumstances England ought to be glad to get rid of them in some other way than by killing them

FROM THE PRESS OF THE NATION.

The Death Penalty in Kansas.

(Topeka Daily Capital)

From the discussion of the governor's proposed recommendation in favor of capital punishment there is considerable error abroad concerning the laws on this subject Briefly the laws are as follows Article 2 of chapter 100 of the statutes concerning crimes and punishments divides murders into two classes those in the first and those in the second degree "Murders in the first degree are premeditated and deliberate and all others are in the second degree Section 8 of this chapter says "Persons convicted of murder in the first degree shall suffer death"

In 1872 the legislature enacted the present law as to the infliction of the death penalty That law is as follows' . The punishment of death prescribed by law must be inflicted by hanging by the neck, at such time as the governor of the state for the time being shall appoint not less than one year from the time of conviction"

There is a proviso in the law, however, as follows.

Provided, that no governor shall be compelled to issue any order as herein provided for the execution of any convict"

It is further provided by law that in capital cases the governor may grant reprieves for a limited time and he may also commute the death penalty to imprisonment for life or for a term not less than ten years at hard labor

This is the whole law on the matter of capital punishment The proviso that no governor shall be compelled to issue an order for the execution of the death penalty has resulted in the abolishment of capital punishment Under the law, however the governor is fully empowered to issue the order The whole tendency of the laws on capital punishment is to have this penalty inflicted The proviso against compulsion on the governor was probably inserted in the law to protect the governor's pardoning power

It is difficult to see how the law can be made more emphatic than its present form that persons convicted of murder in the first degree shall suffer death To enforce this penalty since all governors have refused to do so, it would be necessary to require of the judge of the court in which the murderer is convicted to fix the date of execution in the sentence leaving in the hands of the governor the power to pardon or commute the penalty

Capital punishment is a punitive and not a preventive measure It is the general experience that the laws have little to do with the frequency or infrequency of murders Men capable of deliberate murder of a fellow being do not consider the penalty and whether in this state it is life imprisonment or hanging will in all human probability make no difference in the frequency of the commission of the crime

No Mercy in War

(Chicago Journal)

The denunciation by certain newspapers of Gen Kitchener's course in the Transvaal is irrational and absurd Gen Kitchener was retained in command in South Africa for the purpose of ending the war He is doing what seems to him to be his duty as a soldier and a commanding officer The remnant of the Boers still resisting British authority are engaged in a fugitive guerrilla warfare, the most trying and exasperating form of resistance with which a general officer has to deal Gen Kitchener is responsible to his government and his sovereign for his failure or success He is expected to end the war, and he is taking his own methods to do it

Kitchener is being denounced by the ignorant as a monster because he is crushing resistance at all cost and devastating the country through which he passes It is a merciless process but it has precedents There was a report made to our secretary of war by Gen Sheridan from Woodstock, W Va in 1864 in which occurred the following passage

The grain and forage in advance of these points (Port Republic, Mount Crawford Bridgewater and Harrisonburg) had been previously destroyed In moving back to this point the whole country from the Blue Ridge to the North mountain, have been rendered untenable for a rebel army

I have destroyed over 2 000 barns filled with wheat and hay and farming implements over 70 mills filled with flour and wheat have driven in front of this army four herd of stock and have killed and issued to the troops not less than 3 000 sheep

These destructions embrace the Luray valley and Little Fort valley, as well as the Main valley.

'Lieut John R Meigs my engineer officer was murdered beyond Harrisonburg, near Dayton For this atrocious act all the houses within an area of five miles were burned'

'P H Sherman Major General

In history the invaders of a country have never shown it mercy The theory governing the conduct of the commanders has been that the speed with which the conflict was to be ended depended upon the severity with which it was waged The Germans, French Russians and Italians are accused of many atrocities in their attempts to restore order in China During the German occupation of France the orders to the German soldiers were to shoot down any ununiformed person who should fire a shot Commissary General Pearson a Boer refugee now in this country, says there is not a male Boer who would not shoot Gen Kitchener on sight. He admits also that paroled Boers are taking up arms again and that farmers and noncombatants generally are resisting Poor women have helped to lead British soldiers into ambush In the light of these admissions Gen Kitchener's tactics which are not new in warfare, must be judged as legitimate

To be consistent we must remember that what Gen Kitchener is doing in the Transvaal is precisely what we are doing in the Philippines In both cases resistance is being made to a conqueror and in both cases it is being stamped out When the Boers were killing the English by hundreds and winning victories, there was no appeal for outside aid Having lost they must abide by the arbitrament of battle There is no appeal from it The world may sympathize but it will not aid Civilization now demands the restoration of peace in South Africa Gen Kitchener is following the quickest way of procuring it—by throttling all opposition It is not a merciful way but there is no mercy in war.

Her First Outing.

We had been married just a trifle over two years before I found time to take a genuine good old-fashioned camp A friend of mine and I had been making arrangements all summer for a fall trip, and one autumn evening as I was packing the grub chest I heard a voice say I wish I were going with you All I could say was 'I wish so, too adding 'You shall go next year' The next day John gave up the trip owing to some pressing commercial transaction and as I told my wife at dinner hour that she was to accompany me this year her joy knew no bounds

Our luggage was transported to the river by rail and wagon we following by train when the final day came The next morning when we awoke black wet clouds were seen scurrying from the northwest a chill wind blew and it looked like rain any minute But to the query whether she wished to start on such a day, you would have thought the sun was beaming brightly and everything auspicious for a pleasant trip, as she replied 'Of course I expected this kind of weather camping out So we started loitering down the old slough coming out upon the Father of Waters, everything new and novel to her nature loving eyes How she loved the water the wild woods the green fields and running streams uttering exclamations of delight and surprise at each turn of the creek as new beauties were brought to view

The camping place reached and all the luggage packed to the old cabin we prepared dinner and had just seated ourselves around the frugal meal when it began to blow and rain while we congratulated ourselves on our good luck in getting settled before the storm broke

Then followed a week of pleasant idle days during which we hunted fished and boated her chief delight being to sit in the stern of the boat and float idly with the current as the warm sun tempered the autumn air with a delicious languorous sensation hard to describe but most delightful to enjoy and appreciate

We did not get a great amount of game for we had come out to rest not to work but we had just enough to keep the kettle full in case of company and there were growing appetites that kept the surplus down if the company failed to appear

We took long walks through the aged timber, watched the turnings of the leaves We watched the autumn fogs and mists settle over the river at eventide and saw them rise and evaporate under the sun's influence at dawn We saw the wild fowl in the evenings as they hurried south on swift beating wings and heard their gabble as they fed in the neighboring rice lakes and we saw great flocks of blue herons on their annual pilgrimage and heard their discordant squawks as they flew laboriously along the watercourses We saw where the muskrat and coon had been feeding the night before and heard the screech and hoot of the owl in the big timber We saw the snipe and plover come in on snappy frosty evenings and had glorious sport with them next day on marsh and upland We heard and saw immense flocks of blackbirds as they settled down among the rice beds in the evening and listened to their melodious chuckling as they fed next morning In short we seemed to see and hear enjoy and appreciate every atom of the wild wild woods life around us and were happy and contented with no cares or worries and when it was all over my wife vowed that her first trip would not be the last.—(Forest and Stream

The Camera in Science, Art and Pastime

Of the many discoveries of the eighteenth century which have been brought to a successful and practical issue in the closing years of the nineteenth photography or the science of obtaining records by the action of light is surely one of the most pronounced

That phase of photography known as amateur and which generally has reference to the indiscriminate snap shooting of everything and everybody is the one probably best known to the readers of this magazine Amateur photography has within the last few years assumed enormous proportions "You press the button and we do the rest has a wonderful fascination for all kinds and classes of people and that little phrase has undoubtedly been responsible for hundreds of thousands investing in more or less costly apparatus, and creating for themselves permanent records of their travels and pleasures of their friends, and of their foes It is the easiest thing in the world to take a loaded camera point it at a person or view and to 'snap the shutter' Whether there is any subsequent picture on the plate or film is another matter and with the beginner is often purely accidental But still the case according to the camera salesman with which the little box can be worked and the avoidance of all subsequent dark room mess and splash by giving the picture to the dealer to finish, exerts a spell over the layman, which he cannot resist and once inoculated with the fever—there are few who do not follow up the subject to their own enjoyment and instruction In first considering the desirability of purchasing a camera thought should be given to the purpose to which the camera is to be put Do I want a camera to take on my travels or have I ambition to do more artistic work—to be a pictorial photographer? Do I expect to make money by getting 'news photographs'? Or again perhaps I am a lover of nature, and desire records of the habits of my four-footed or winged friends For all these varied purposes I needs must seek an instrument which will give me what I desire for no camera will properly serve all purposes J C Abel

—(From the Modern Culture Magazine for November

Locusts.

During the hot still days of August and even during early September, may be heard from the tree tops the shrill cry of the locust,' a name applied by the small boys of the tree country to the cicadas large hemipterous* insects found from New Hampshire southward and westward through the tree-covered country as far as Kansas In the prairie region oftentimes ravaged by the grasshopper plague the name locust is properly applied, and is given to the so-called Rocky mountain locust which is in fact a grasshopper

The locust of the tree country is a very different creature He is well known to the small boy who when he finds one on the ground looks carefully at the markings on the upper surface of the thorax in order to learn whether during the next year peace or war will prevail on earth If on the thorax are markings which look like the letter W, the boy knows that the next year will be one of wars and gravely announces this fact to his young companions who with him, speculate as to what countries will be involved The small boy manufactures from a straight piece of wood some twisted horsehair the thick glass about the mouth of a bottle and a bit of parchment a musical instrument which he calls a 'locust' and by means of which a sound very much like that produced by the insect is made

Since the locusts live chiefly in the tree tops and are rarely seen except when dead or dying they are much less well known than many other insects and indeed most people have very little notion of what the creature is that makes the loud long drawn out and droning sound that comes from this insect in the late summer The sound is caused by a peculiar apparatus possessed only by the male locust, and situated beneath the wings in large cavities at the base of the abdomen There are two large parchment-like sacks, ribbed and gathered into many plaits and folds and when the air is driven with great force against these plaited surfaces the vibrations caused produce the loud, penetrating shrill sound with which we are all so familiar—(From Forest and Stream

*Hemipterous, half-winged'

The Orphan Mine Troubles in Court

One of the most important mining suits that has been placed upon the court records in the Fourth judicial district for a good many months was that filed yesterday afternoon in the district court by Lunt Brooks & Willcox as attorneys for the plaintiff in a suit entitled as follows

William E Boyle individually and for and on behalf of all other stockholders of the Orphan Gold Mining company, a corporation who may join in this suit and avail themselves of the privileges thereof plaintiff vs Nelson B Williams George D Kilborn W T Doubt individually and as directors of the Orphan Gold Mining company, F B Gibson [illegible] and W H Spurgeon individually and as directors of the Orphan Bell Mining and Milling company the Orphan Gold Mining company a corporation and the Orphan Bell Mining and Milling company a corporation Nelson B Williams as president and director of the Isabella Gold Mining company and the Isabella Gold Mining company defendants

The circumstances that have occasioned the bringing of this suit as set forth in the complaint filed yesterday are that the Orphan Bell Gold Mining and Milling company sold to the Orphan Gold Mining company of which Nelson B Williams was a director a portion of its property that later Mr Williams acquired more Orphan Bell stock and got the benefit of the dividends paid by the company out of the purchase price paid by the Orphan Gold Mining company Mr Williams then secured a control of the Orphan Gold Mining company his interest being less however than that which he held in the Orphan Bell that it was the evident intention of Mr Williams to consolidate or bring about a consolidation of the Isabella Gold Mining company the Orphan Bell Gold Mining and Milling company and the Orphan Gold Mining company that Mr Williams as president of the Orphan Bell Gold Mining and Milling company said to Mr Williams as president of the Orphan Gold company that the title to the ground which he had sold to the Orphan Gold company was [illegible] that Mr Williams president of the Orphan Gold company said that Mr Williams president of the Orphan Bell company was right that as a result the Orphan Gold company gave to the Orphan Bell company by contract about one third of its ground by the lease of W H Spurgeon which was set forth in yesterday's Gazette this being alleged to be a settlement of the claim of the Orphan Bell company against the Orphan Gold The minority stockholders of the Orphan Gold company declare that their title to the ground purchased from the Orphan Bell is good They sue to set aside the lease to Spurgeon and for the appointment of a receiver for the Orphan Gold company also for a receiver for the Orphan Gold company and for an order compelling the Isabella company to allow an inspection of its property to ascertain how much if any ore has been removed from the ground of the Orphan Gold company

On application of plaintiff an injunction was granted requiring all of the defendants to do no act affecting any of the property of the Orphan Gold company or any lease or ground involved in the controversy

The case is set for hearing on Monday morning at 10 o clock

In the district court yesterday Catherine Nunes sued for divorce from Frederick Nunes The two were married according to the allegations in the complaint in Chicago in 1894 and now have one son five years of age Mrs Nunes charges her husband with adultery and failure to contribute to the support of herself or the boy since December 1898 She seeks a divorce and the custody of the child

In the district court yesterday the case of Solomon Fretz vs the Colorado Philadelphia Reduction company was on trial Plaintiff sues for $10 000 damages for personal injuries alleged to have been received by negligence of the company in September 1898 The evidence was concluded and the court will rule this morning at 9 o clock on a motion of defendants that the jury be instructed to bring in a verdict for the defendant

The jury in the case of Davison vs Goodwin in the county court returned a verdict in favor of the plaintiff for $.03 at 6 o clock last night The suit involved a promissory note for $750 A block of Black Diamond mining stock had been given as collateral on the note and the suit was to determine a [illegible] point whether the stock was in fact collateral or payment of the obligation

The case of Scales vs Scales in the county court was yesterday dismissed by Judge Hubbard on motion of the plaintiff

Glee Club Has Prepared Itinerary

Harry I Ross manager of the Colorado College glee club has returned from his tour of the state on which he arranged for a concert tour of the club, Mr Ross had very good success in making his dates The club will cover a lot of new territory on this trip The trip commences on the last day of the year and ends on January 16 Fifteen concerts will be given.

The itinerary for the trip is as follows

December 31—Cripple Creek

January 2—Glenwood Springs
January 3—Grand Junction
January 4—Montrose
January 5—Delta
January 7—Provo Utah
January 8—Salt Lake City Utah
January 9—Ogden, Utah
January 10—Rock Springs Wyo
January 11—Laramie Wyo
January 12—Cheyenne Wyo
January 14—Greeley Colo
January 1[illegible]—Eaton Colo
January 16—Denver

SMALLPOX CASES

There are a number of cases of smallpox in Colorado Springs A good many people are talking about it and a senseless scare may result unless the exact truth is made public A week or 10 days ago a man with smallpox came down from one of the grading camps on the new railroad The case really belongs in Teller county and there was some friction about caring for the man but he was finally placed The city officials have prepared a new pest house out near the county hospital as the buildings out by the cemetery were carried away in the big wind storm A smallpox case has appeared at 411 East High street another out on East Boulder beyond the old reservoir one at 415 West San Rafael street and another at 232 East Cimarron street These cases can be traced to having come from Pueblo They are very light and the trouble is that the patients did not know that they were ill

The cases had not been called to the attention of City Physician Hutchings until the past three days He has taken hold vigorously and will stamp the disease out Dr Hutchings said last night that all of the sick are being removed to the pest house and the houses where they were stopping have been quarantined He says that there is no danger of an epidemic if the people will only be sensible and get themselves vaccinated

There seems to be a wave of smallpox all over the United States at the present time and in some of the larger cities one cannot go a block without seeing the signs out There are a number of cases reported over near the old glass works at Colorado City, and some exaggerated reports have been made concerning them.

Dr Christopher went to Cripple Creek on Thursday as a member of the state board to examine the cases there He says that what they seem to have there is what is known as Cuban chickenpox It has the appearance of smallpox but leaves no scars on the skin He has had a large experience in the treatment of smallpox From what he has heard he rather thinks the cases at Colorado City may be the Cuban brand although he has not seen them.

Dr Hutchings has employed a competent physician to handle the cases and the police department is doing everything possible to strictly quarantine the infected places If there have been persons exposed to it 14 days will show whether they have been infected The city physician will give a bulletin of each case of the disease so that the people can know the truth and not believe foolish rumors

Master of Accounts—W D Nye
Physician—F C Hayman
Overseer—Ulrik Johnson
Correspondent—Fleming Neff
Watchman—J W McCord
Sentinel—J A Keys
Guard—Miss Singmaster
Lady Rowena—Mrs Addie King
Lady Rebecca—Mrs J I Young
Musician—Mrs Daken
Auditing committee—Messrs. Young and Schofield

Removed to 111 North Tejon St—Hunter Suit cleaned and pressed $1 50, velvet collars, $1.50.

PERSONAL MENTION.

C H Wakefield left over the Santa Fe for El Paso Tex yesterday

Mrs J C Connor has returned from the east after a two months visit

Mr Hanford left yesterday for California traveling on the D & R G

Mr A A M Knight of Denver was down yesterday on business matters

Miss McGovern and her guest Miss Lindquist leave this evening for Denver

William A Burroughs left over the Santa Fe for Phoenix Arizona yesterday

Mrs A D Searl of Leadville is visiting with her son A D Searl Jr of Colorado City

Mr J B Wiggenhorn traveling passenger agent of the Colorado Midland is in the city for a short stay

Miss Lois Cornforth of Kansas City is the guest of her brother Judge Arthur Cornforth for a few days

Mr J R McKinnie was in Grand Junction yesterday on business connected with his beet sugar industry

Thomas E Fisher general passenger agent of the Colorado & Southern road was a visitor among the railroad offices yesterday

Mr W J Moyer a prominent business man of Grand Junction was in the city yesterday visiting Mr Will Weiser of Colorado College.

Mr Philip D Wilson returned yesterday from Cripple Creek and expects to leave this morning for the south where he will spend the winter

Mr Charles N Cox of Grand Junction who has been managing the beet sugar industry at that point was an arrival yesterday at the Alta Vista

Ed Taft who formerly attended the High school here but who has been in New Mexico for the past two months is in the city for a short stay

A number of the officials of the Colorado Midland passed through the city yesterday morning en route to Denver after having made a tour of inspection of the road

Mr V L Cooper who has been connected with the Colorado Midland band for the past year will shortly leave for Lincoln Neb where he will join the band and orchestra of the C E Beyerle Theatrical company, which is on the road Mr Cooper has a host of friends who will be glad to learn of his good fortune and the Midland band will lose one of the best drummers in this part of the country

PICTURESQUE COLORADO

It is not safe these days to ask any business man if he has a copy of Picturesque Colorado One is likely to get something thrown at his head at least that is what an agent got the other day The tale is one of grief and it is long Last summer a smooth agent spent some time in the city and he had a sample book of views taken in Kentucky He was getting up a similar book on Colorado and it was to be something unexcelled The price was to be $1 85 for one volume, so some of the purchasers claim They put their names down to a contract any way This week another agent has come along and is distributing the publication There are about a dozen of them and each costs $1 85 There are 15 or 20 pages in each volume with some half tone cuts and a bit of reading matter that sounds like Hall's history of the state Each has a leatherette cover according to contract A good many of those who subscribed have paid their money but others have declined They state that they are not getting what they contracted for One well-known attorney declined to take his bundle of books and informed the agent that if he left them they would get down stairs faster than he could They did, too for he pitched them out a second-story window and they landed at his feet A crowd of the brokers got to telling their troubles over the affair one night last week and they turned it into a jollification Now they have decided to hold an annual celebration of the event Those who have paid are out something like $20 in cash but they have some views of Colorado scenery People looking for books of views can get them cheap by applying to almost any one on the exchange

CANDIDATES' EXPENSES

The El Paso county candidates in the recent election have filed their expense statements with the county clerk with the exception of F F Noxon candidate for constable who failed to make any return as called for by law

The other candidates did not spend any very great sums of money the highest amount spent by any one candidate being $350 by W H Fairall Republican candidate for county commissioner He spent just $2 more than was used by the opposing candidate Mr Sinton

Judge W N Ruby spent $[illegible] which was about $1[illegible] more than was expended by T B McClelland the successful candidate for justice of the peace Mr McClelland certifies to having expended $187

George Hackley who was elected constable to succeed himself states that his election expenses footed up to the enormous sum of $12 and Mr Noxon the man who opposed him apparently forgot all about having paid anything as he made no return

Dr W A Shepard Has Removed

To permanent offices in the Davis building next to Alamo hotel second floor front where good light, sufficient heat and fast elevator service will be at the service of his patients

Board and Room Wanted.

RUSSELL GATES MERCANTILE CO.

COLLEGE DEBATERS WILL HAVE MANY CONTESTS.

The Colorado College Oratorical and Debating association has a year of big debates mapped out The society has been carrying on a debate with the University of Nebraska for three years and this year Washburn college at Topeka Kas has asked for and been granted a debate with Colorado College

The letter with a challenge from Washburn college was received a few days ago and at a meeting of the Oratorical and Debating association it was decided to accept the challenge The Washburn people stated that the relations with Colorado College in football this fall were so pleasant that they wish to become better acquainted with this institution and so proposed a debate This debate will probably take place in Topeka Kas The annual Nebraska debate occurs in this city in the spring The college also takes part in the state oratorical contest and these three big events will give an opportunity for all forensic talent in the college to make a showing

The Apollonian club and the Pearsons Literary society the two debating clubs among the young men of the college are now preparing for their annual inter society prize debate which will be held early next year The Gothenberg system of controlling the sale of liquor is the question to be debated The Apollonian club will hold its preliminaries to choose debaters to contest with Pearsons next Friday night It will be behind closed doors

NEW LODGE K. OF P. OFFICERS

Syracuse lodge No 111 the new lodge of Knights of Pythias held its election of officers on Thursday night There was a very large attendance of members and of visitors from Myrtle lodge A number of candidates were put through the initiatory degree A committee was appointed to confer with Myrtle lodge with a view to holding a joint public installation ball and supper of the two lodges during January at the Temple theater

The new officers elected on Thursday night are

James H Long chancellor commander
J H Flansburg vice chancellor
Phillip W Packer prelate
Alex Reibscheid master of the work
William F Elsworth keeper of seals and records
A M Wackenhut master of finance
A E Wilson master of exchequer
Louis F Theobald master at arms
C M Mills inner guard
Frank Theobald outer guard
Robert A Christy trustee
Dr Estill physician

The chancellor commander, vice chancellor prelate master of the work master at arms, inner guard and outer guard are elected for a term of six months The keeper of seals and records master of finance master of the exchequer and physician are elected for a term of a year The trustee is elected for a term of three years

JUSTICE COURT NEWS

John O Brien was arrested by the police yesterday on a charge of petty larceny and taken before Judge Ruby His hearing has not been set yet It is charged by the complaining witness that O Brien stole a $2 pair of shoes from Frank Gilberg who owns a store on Huerfano street and sold them Chief Henry made the arrest

The case of the People vs Archem Buckner came up for hearing before Justice Ruby yesterday afternoon and the defendant was discharged Buckner was charged with stealing some hay from a barn in the rear of the Metz laundry and in the trial the value of the hay was found to be 14 cents and that the defendant was not stealing it These facts being proven the jury brought in a verdict of not guilty

A suggestion worthy of the serious attention of congress is made by Dr A H Doty, the very competent health officer of the port of New York He says that yellow fever will continue to live in Havana and to have serious outbreaks every summer until $10 000 000 or $15 000 000 is put in a first class sewerage system for that city and he advises that congress make an appropriation for the performance of this work, because the Cubans being immune do not realize its importance and therefore will not spend the money Dr Doty whose careful guardianship of the sanitary interests of the great port of New York have won the admiration of all our commercial bodies says that business reasons would justify the proposed action of congress The fruit trade is practically shut out from our gulf ports during the entire summer, and even the shipping bound for New York is subject to serious delays and restrictions because no one can come from the fever-infected port of Havana to this country by way of Florida without jeopardizing the health of the community The recent outbreak of yellow fever in Havana, Dr Doty says need not alarm the people of New York because the disease cannot live in our climate and in the course of a month or two the frosts will furnish sure protection to the cities of the south Dr Doty's suggestion regarding the purification of Havana should have the prompt attention of congress at the approaching session It is a matter which President McKinley might well consider in his annual message —(Leslie's Weekly

THE ANACONDA STRIKE

Fifteen Foot Body of Quartz Mineralized Across the Entire Breast--Lessees Will Ship From Mountain Beauty Strike.

Special to the Gazette.

Cripple Creek, Dec. 7.—When the last shot was put in tonight in the Anaconda mine there was disclosed a 15 foot body of quartz which is mineralized for good values across the entire breast. It becomes a more firm belief in the minds of the operators that the famous Mary McKinney shoot is the one which is being cut at a distance of 800 feet from surface in the Anaconda workings. The ore body has not yet been cut through and is full of crystal like streaks which [illegible] very valuable [illegible] high as 7½ ounces in gold to the ton. The vein was cut at a point below where the ore exists in the original drift and the formation shows a water quartz full of bug holes without any great values. An upraise was made after the vein had been cut through and a crosscut was started backwards to the ore body. As soon as the vein is sufficiently explored the water quartz body will be drifted on where the operators expect to find ore after cutting through it and the work of stoping will be begun. Crosscuts were run to the vein on several levels above the 600 foot point but it was found to be without values and no crosscut was run from that depth to the present lower level.

The [illegible] leasing company operating on a block of the Anaconda company's property are reported to be in good ore on the same vein but the rumor cannot be verified at present.

Mountain Beauty

The strike which was announced a few days ago on block 3 of the Mountain Beauty Co.'s property on Bull hill has turned out to be more of a shipping proposition than was at first supposed. A two foot vein of ore that runs $150 to the ton has been uncovered along side of the four inch streak of $8 000 ore. The rich ore body was uncovered at a depth of 160 feet in the drift and it is thought the lessees will commence shipping immediately.

The output of the Los Angeles mine on the south slope of Bull hill shows a decided increase and the property is reported in better condition than it has been for some time.

The foundation for the new hoisting plant to be installed over the Woods Investment Co.'s shaft on the Morning Glory of the Work company is nearly [illegible] and the plant which it is expected will be in working order in the next 10 days. A cage has been substituted for the bucket running in connection with the hoist now in use and the other cage which is designed for the use of the Jack Pot will be run in connection with the new hoist.

A carload shipment of smelting grade ore was sent out today from the Little May on the west slope of Beacon hill.

At a depth of 90 feet in the Woodman of the Merrimac company lessees are crosscutting for the Mary Nevin vein. Lessees have been at work for about four weeks and expect to cut the vein in a very short time.

The case of the Anchoria Leland M. & M. Co. against the Jefferson Mining company has been put over to the next term of the district court. The case was to have been tried today after many unsuccessful attempts at a hearing.

A new hoisting plant is being installed by the lessees operating the Raaley claim of the C. K. & N. Co. on the west slope of Beacon hill. The shaft is down to 2[illegible] feet and the lessees realized some time ago that development work could not proceed without a new and better equipment.

SEDAN HAS SOME FINE ROCK

It Resembles Very Closely That Which is Coming Out of the Sunshine, and a Shipment of it Will Be Made in a Week.

Some specimens of the rock which is being taken out of Lessee Kellum's shaft on the Anna Belle claim of the Sedan Gold Mining company were seen yesterday by a representative of the Gazette in the offices of the company in the Giddings block. The rock is of a [illegible] formation resembling very closely that which is found [illegible] neighboring claim, the Sunshine, upon which Mr. Kellum is also leasing.

The shaft on the Sedan is now down to a depth of something over 40 feet and it has been in the brownish rock all out from the beginning which is beginning to give some encouraging assays although the officers of the company are exceedingly conservative in speaking of it and say that no legitimate ore shoot has yet been opened up on the Sedan although they express confidence that they will soon have it just as rich and more of it than has been opened on the Sunshine.

The rock assays around $[illegible]0 on the average and some specimens are taken out of the vein which run into the thousands of dollars to the ton. The vein from its present angle will extend through the Sedan property with the length of the claim and the management is expecting to get a large amount of the ore on the dip.

Shipments are being maintained regularly from the Sunshine which run [illegible] three ounces in gold to the ton and it is expected that the first shipment will leave the Sedan within a week.

The stock of this company has made a phenomenal spurt during the last few weeks advancing from around 2 to 6¾ cents yesterday. The strength of the stock yesterday, all the more noticeable for the weakness of the market, was probably due to the fact that Sedan will soon be on the shipping list.

The discovery of this kind of rock on Galena hill is of great moment to that section of the camp and will do a great deal to assuage the wounds which the condition of Stratton's Independence have caused.

AN ELECTRIC HOIST FOR M. J. T.

The Directors Will Probably Decide to Erect a Substantial Shaft House as Well, and Then Begin Active Mining.

The directors of the M. J. T. Gold Mining company will meet today and probably decide to go to work at once on their Gold hill property. Four out of five of the directors are in favor of erecting a substantial shaft house, installing an electric hoist and starting to work in the shaft at once.

It will be remembered that last spring the graders on the new railroad uncovered a very promising lead on the claim, and some slight work was done on it although the work was soon suspended as it was clear that it would have to be done on a larger scale. Ever since then the management has been contemplating the inauguration of the work which they will probably decide upon today.

The work which was done on the claim went to show that a large basalt dike cut across the property and the management is of the opinion that this carries the extension of the Moon-Anchor vein and when work is started the prospecting will be aimed to proving the correctness of this surmise.

The company owns the M. J. T. and Grover Cleveland lodes on Gold hill, well located, and has an ample fund in the treasury so that it could undertake some thorough work on the property.

A COLONIAL DAMES STRIKE

Ore Resembling the Sunshine Rock is Reported to be Opened by Lessee Robertson on the Silver Lake Claim.

Information was received in this city yesterday morning to the effect that there had been a strike made on the Galena hill property of the Colonial Dames company but this could not be corroborated in this city and President Emerson of the company left yesterday for camp to examine the matter.

The statement was made that Robertson & Co. who are leasing on the Silver Lake claim of the Colonial Dames had broken into a body of ore which they believed to be the extension of the vein which has been opened up on the Sunshine property about [illegible]00 feet distant. According to the direction which the vein takes in the Sunshine and Sedan it does not seem possible for it to get into the Colonial Dames, but the important feature of the announcement is that another strike has been made on Galena hill.

These lessees went to work only a short time ago and as there was no deep shaft on the property they prospected around until they found some kind of a lead and then followed it. The ore which they are reported to have opened is said to be of the same peculiar formation which has been opened on another section of this hill.

It is usually the case that one strike in Cripple Creek is soon followed by another in the same locality and it looks now as if Galena Hill were not an exception to this rule.

WAVERLY WILL GO TO WORK

On Its Peg Leg Claim on Gold Hill, Erecting a Shaft House and Installing a Plant of Machinery.

It is announced that the Waverly Gold Mining and Milling company will begin work on its own account in the very near future.

This company owns the Peg Leg claim on Gold hill and some land on Lincoln mountain and it is upon the Gold hill property that work will be started. The Peg Leg contains but a little over [illegible] acres but [illegible] the management thinks it will be very advisable to assume work on it on its own account, and as there are [illegible]00 shares of the stock in the treasury the [illegible] can be easily secured. It is understood that there is some sort of a deal on now for the sale of a portion of this block of stock, enabling the company to begin work.

The shaft at present on the Peg Leg is down to a depth of 80 feet but is not equipped with any adequate machinery for good work at that depth and it is understood a plant of machinery will be installed, a good shaft house erected and the shaft put down to the depth of 400 feet at least.

MINING NOTES AROUND TOWN

The adjourned annual meeting of the stockholders of the Moon-Anchor Gold Mining company has again been postponed, this time for 30 days. The meeting was to have been held yesterday, adjourned from the one which was held some weeks ago when the consolidation matter came before the stockholders, and it was expected that some final action in the matter would be taken yesterday but several officers of the company were out of the city and it was found advisable to postpone again.

NUGGET AND JACK POT STOCKS WERE STRONGER

Considerable interest was aroused yesterday in the strength of Nugget and Jack Pot stocks, the former selling up to 25 and the latter to 60¼. Jack Pot has been trying to reach 60 for a long time and finally made it yesterday with the impetus which the consolidation rumors gave to it. Ingham stock was not particularly noticeable. At the last accounts the parties to the proposed deal were still sparring for points in Denver and it cannot be guessed whether some plan can be arranged which will be acceptable to all or not. A deal, like Rome, is never built in a day and it may be a long time yet before this plan of consolidation which has been argued up one side and down the other for some months is finally brought about.

ACACIA MADE A FINE SHOWING IN NOVEMBER

Returns have just been received of all the shipments sent out from the different workings on the claims of the Acacia company during the month of November and they show that $6 300 was received in royalties from lessees and of course the amount of their production would make a sum four times as large and the company received from the ore which they shipped from the Brady workings the sum of $1 700 which brings the earnings of the company for the month up to $8 000. It will be seen that this amount is much more than that which is needed to pay the quarterly dividend of $15 000. It is expected that during the present month the output will even exceed November's figures as several new ore bodies have been developed in different parts of the property, a production from which will be started right away and which will very materially add to the sum total of this company's output.

CORIOLANUS IS NOT CROSSCUTTING FOR ORE

It transpires that the crosscutting now in progress at a depth of 500 feet on the property of the Coriolanus property on the south slope of Battle mountain is not for the purpose of cutting the vein at this depth. It is announced that the crosscut is being run westward to connect with an old shaft for ventilation purposes. After this is accomplished the main shaft will be continued to a depth of [illegible] feet at which point a crosscut will be started east in search of the vein and the ground will also be crosscut north and south. The mine is splendidly equipped with a large engine house, eight drill compressor, 1,000-foot hoist and all that is needed to operate a large property.

ANACONDA STRIKE IS A TOPIC OF CONVERSATION.

The chief topic in mining circles today is the great strike which has been made on the property of the Anaconda company and although many are awaiting further developments before acknowledging it to be the strike that is claimed for it all are unanimous in pronouncing it to be of the greatest significance to Gold hill and the camp as a whole if it prove up well. The Anaconda company has been forging steadily ahead ever since its reorganization and the royalties which are now being received from lessees are sufficient to pay 2 per cent on the capital stock of the company. The surface of the property has been divided into 44 blocks for the purpose of leasing, 32 of which are now being worked, and all the ground below the tunnel level has been reserved for the company's work.

SINKING ON THE LITTLE DIAMOND CLAIM.

Lessee Ferris, operating the Little Diamond, the Battle mountain fraction belonging to the Big Four company, has suspended his drifting at the 100 foot station and resumed sinking in the shaft. He began his drifting after encountering a promising body of ore in the shaft but the shoot was not a permanent one and he found he would be obliged to go deeper. In the 30 feet of sinking which he has now accomplished below the first station he has been getting excellent assays and his shoot has the appearance of permanency but he is still unsatisfied that it is what it appears to be and will not suspend sinking until he has attained considerable more depth. In the meantime the Little Diamond is a very cheerful prospect.

LITTLE WILLIE HELD MEETING YESTERDAY.

A meeting of the Little Willie Mining company was held at the office of the company, room 43 Durkee building, yesterday. The meeting was called for the purpose of electing a board of directors and for the purpose of extending the corporate existence of the company for another twenty years. About two thirds of the stock was represented and the following officers and directors were elected: W. L. Cook, president; R. W. Anderson, vice president; F. O. Wood, secretary; J. B. Fowler, treasurer; Dr. Wilmer Culver, F. T. Marsh and F. L. Martin. The company own the Little Willie, a full patented claim in Gunnison county, in the old Ruby mining district. The company intend to add some other property and increase the capital stock.

BIG-HEAD CHILDREN with long thin necks you see them in every school want Scott's emulsion of cod-liver oil, to build up their poor little shrunken scrawny bodies.

School will be of no use to them. Something will carry them off.

They have no play in them. There is no fun in playing, when everybody else can run faster, jump further, turn round quicker and keep on longer.

Big head is no harm, let the body be big too.

We'll send you a little to try if you like.

The Right Thing Has Been Found—A Colorado Springs Citizen Shows the Way

Once more we are indebted to a Colorado Springs citizen for a public statement that throws more light on a subject of ever increasing interest. People have been deceived by false misrepresentations from time immemorial. No wonder they are skeptical of all claims indorsed by strangers, residing in far-distant parts of the Union. It is no longer necessary to accept such indorsements for local citizens are giving their testimony and tis an easy matter for any reader to investigate the correctness of such evidence as the following.

Mr James Niles of 15 East Cimarron street, carpenter, says: "During the fall of 1898 and the winter of 1899 an attack of backache persistently clung to me. If I had taken it in time I might have checked it in its earliest stages but I neglected it and when I procured Doan's Kidney Pills at Jones & Wellington's Drug store 109 North Tejon street there was not the slightest doubt but some derangement of the kidneys caused the annoyance. As the treatment cured me I am only too pleased to indorse the remedy."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—Doan's—and take no substitute.

When the stomach is tired out it must have a rest, but we can't live without food. Kodol Dyspepsia Cure digests what you eat so that you can eat all the good food you want while it is restoring the digestive organs to health. It is the only preparation that digests all kinds of food. Hefley Arcularius Drug Co and C E Smith, 117 Tejon St.

Buy them at once. We believe they will soon be regular dividend-payers and we consider them worth considerably more than present selling prices. We shall be glad to give our reasons in detail upon request.

THE CROSBY-EHRICH SYNDICATE

Brokers, Mines, Stocks and Investments
Rooms 59-66 Hagerman Building, Colorado Springs, Colo., U. S. A.
Cable Address: "SYNDICATE, COLORADOSPRINGS."

I am sure there are handsome profits to be made on the the following stocks if you purchase now, viz:

LUCRATIVE
ST. THOMAS and
ZOE

The properties of the Lucrative and Zoe have good ore and are shipping regularly.

The St. Thomas also has good ore opened up, has a sufficient treasury fund, and the property will be mined vigorously by the Company, and by lessees. Within one week this company will start with a large force of men, and I will venture to say, that within two months regular shipments of good ore will be made. I assure you, that in my opinion these stocks will sell at much higher prices than ever before.

M. KINNEY, Mines and Mining Stocks

Cable Address, "KINDUN."
Use Western Union and Bedford McNeill codes.

THE COLORADO SPRINGS MINING STOCK EXCHANGE

Colorado Springs, Dec. 7.—The market today on the Colorado Springs Mining Stock exchange was better in some ways, although there continued to be a considerable amount of weakness displayed in all of the departments and the prospects list was quite noticeable for the exceeding lightness of the trading there. The mines list, however, has not been more generously patronized in some time, and stocks on the whole in that department held their own, and one or two good advances were scored. Unlisted stocks were in less favor, selling listlessly, although without especial weakness. The important strike made on the property of the Anaconda company, however, was easily responsible for much of the better feeling shown, where it was shown, and for the rest, the market remained in the same unsatisfactory condition where it was yesterday. The strikes which are being made right along in Cripple Creek will soon brace up the market, however, and if this strike in Anaconda proves to be what present conditions now forecast, much of the pessimism which has been holding sway for nearly a month now will slink away.

Although Anaconda sold up above 50 in the morning on good reports and the whole market looked encouraging for a little while, in the afternoon the stock sold down to 48½ and the market looked worse. In the mines list, as in all of the departments, excepting the prospects list, the trading was lighter and while some advances were scored, they were scored in spite of the general condition of the market. Jack Pot was one of the stronger stocks, selling up to 60½, due probably to the Anaconda strike and a belief that Jack Pot may get more than Anaconda; and Nugget was also a feature, selling up to 25 on the consolidation rumors. There may be a connection between the strength of Jack Pot and Nugget. Gold Dollar, in the mines list, looked better at 23¼, while Portland gained three cents. Damon sold at 12½, and many stocks did not look much better.

The trading for the day amounted to 563,054 shares, of which the cash value was $128,826.

ECZEMA'S ITCH IS TORTURE.

Eczema is caused by an acid humor in the blood coming in contact with the skin and producing great redness and inflammation; little pustular eruptions form and discharge a thin, sticky fluid, which dries and scales off; sometimes the skin is hard, dry and fissured. Eczema in any form is a tormenting, stubborn disease, and the itching and burning at times are almost unbearable; the acid burning humor seems to ooze out and set the skin on fire. Salves, washes nor other external applications do any real good, for as long as the poison remains in the blood it will keep the skin irritated.

BAD FORM OF TETTER.

"For three years I had Tetter on my hands, which caused them to swell to twice their natural size. Part of the time the disease was in the form of running sores, very painful, and causing me much discomfort. Four doctors said the Tetter had progressed too far to be cured, and they could do nothing for me.—I took only three bottles of S. S. S. and was completely cured. This was fifteen years ago, and I have never since seen any sign of my old trouble."—MRS. L. B. JACKSON, 1414 McGee St., Kansas City, Mo.

S. S. S. neutralizes this acid poison, cools the blood and restores it to a healthy, natural state, and the rough, unhealthy skin becomes soft, smooth and clear.

S.S.S. cures Tetter, Erysipelas, Psoriasis, Salt Rheum and all skin diseases due to a poisoned condition of the blood. Send for our book and write us about your case. Our physicians have made these diseases a life study, and can help you by their advice; we make no charge for this service. All correspondence is conducted in strictest confidence.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

When you need a soothing and healing anti-septic application for any purpose, use the original DeWitt's Witch Hazel Salve, a well known cure for piles and skin diseases. It heals sores without leaving a scar. Beware of counterfeits. Hefley-Arcularius Drug Co. and C. E. Smith, 117 Tejon St.

Best screened lump, $3 per ton.

Why Should Colorado Not

BECOME FAMOUS FOR OIL AS WELL AS GOLD.

The present indications and development now going on in Routt County Oil District promise to make it such. If you did not invest in Cripple Creek in the early days when prices were low; profit by the experience and invest now in **Routt County Oil** stock before prices go higher. Oil of a high commercial value has been struck here. Immense profits will be made by those who invest now. Do you know that Oil mining is the safest, surest and most profitable industry in this country? Values in this new oil field will double and triple in the next six months. Routt the banner county of Colorado will be the scene of one of the greatest Oil strikes ever known. There is no enterprise before the public to-day that offers the chances for making such large profits as good Oil stock.

The Northwestern Oil and Coal Company owns large tracts of land in the center of the oil basin and without doubt has some of the very best oil land in the entire district.

Drilling on the first oil well is going on night and day.

FINANCE AND COMMERCE

Dun Reports Business Progressing Along Conservative Lines.

WITH CONFIDENT UNDERTONE

Price of Commodities Steady and Holiday Trade Brisk at all Points New York Stocks Weak.

New York, Dec. 7.—R. G. Dun & Co.'s review of trade tomorrow will say:

Business is progressing along conservative lines. It is without excitement and without great speculative activity, but with a confident undertone which is to be explained largely by the fact that leading concerns in the most of the chief industries have orders booked to employ their machinery at nearly full capacity during months when curtailment was usual. No net reduction in working force has appeared in the last fortnight and a readjustment of wage schedules in some branches of the steel trade is effected without trouble. Prices of commodities are generally steady and holiday trade is brisk at all points. The south is particularly cheerful with cotton and the rice crop coming in at very fair prices.

There is no cause for alarm in the small volume of new business at iron and steel centers. With the first sign of higher prices there came forward such a flood of contracts that mills and furnaces booked orders sufficient to keep the full force employed for months. Hence there has come a more quiet condition with less bidding for products. Fortunately quotations were not forced up unreasonably during the week's greatest activity and now there is no sign of depression. On the other hand bars are more firmly held while many idle mills have resumed in this department and sheet makers also insist on better terms. Other forms of finished material are steady and at most points pig is unchanged although concessions are made for Bessemer at Pittsburg. Numerous bridges are being erected by the railroads and a heavy tonnage of structural steel is taken. Other railway supplies are in active demand with rolling stock urgently sought. Business in iron is particularly brisk at Chicago. With slight moderation in domestic buying more attention is given to exports.

For the first time in many weeks the cereals exhibited strength and some advance was to be expected after the extensive decline. Wheat was started upward by the foreign markets and prompt response here compelled covering of contracts. Nothing of importance was learned regarding domestic conditions aside from the heavy marketing at interior cities as indicated by western receipts of 5,825,402 bushels, against 3,902,798 in the previous week and 5,233,010 a year ago. On the other hand exports at the Atlantic coast cities were only 2,214,409 bushels against 3,359,677 in 1899.

BRADSTREET'S

Quieter Tone and Reduced Volume of Business at Wholesale Usual to the Season

New York, Dec. 7.—Bradstreet's tomorrow will say:

There is a quieter tone and reduced volume of business doing at wholesale in many lines, but this is not unusual at this season and is partly balanced by a large interest in retail and holiday distribution. Weather conditions are still a drawback to the trade in winter weight goods but it is notable that a better report comes from the northwest than for some weeks past. Finished products monopolize the activity in the iron and steel trades with bars, plates, sheets and bridge material most active. Even in finished lines however there is less reported doing in new business but Pittsburg and Chicago mills are reported sold ahead 60 to 90 days. At Chicago plates are scarce and a premium is offered for early deliveries of galvanized and black sheets. The rail market is active and 60,000 tons were sold at Chicago this week while the total amount on the rail mill books is claimed to aggregate 1,000,000 tons while good sales of pig are reported at some markets; business as a whole in this line is quieter without however any lack of firmness. Much is heard about forthcoming reduction in cost of ore, coke and labor and this undoubtedly checks ordering ahead but higher prices for rails are talked of and southern furnaces are reported heavily sold ahead. There is little or nothing doing in Bessemer pig and billets. Among the other metals copper is active and firm but tin is weaker.

Wheat including flour shipments for the week aggregate 3,432,151 bushels against 2,497,880 bushels last week and 5,173,331 in the corresponding week of 1899.

From July 1 to date this season wheat exports are 81,221,456 bushels against 94,301,2?3 bushels last season and 103,476,934 in 1898-99.

Failures for the week number 234 against 184 last week and 220 in this week a year ago.

Canadian failures number 27 as against 28 last week, 31 in this week a year ago.

FINANCIAL REVIEW

Investment Demand for Bonds and Dividend-Paying Stocks is on Large Scale

New York, Dec. 7.—Bradstreet's financial review tomorrow will say:

During the past week there has been a further slackening of speculative activity at New York. The public is no longer buying stocks with vigor and while advances have been scored in various parts of the railroad share list they seem to be the result of support by large interests or manipulation by bull pools.

The professional element has also continued to exhibit more or less inclination to work on the bear side, although so far as railroad stocks are concerned the impression produced by their attempts to depress prices has been comparatively small.

In the industrials however declining tendencies have been more pronounced. The fact that the directors of the American Sugar company instead of increasing the dividend on that stock to 2 per cent quarterly as was anticipated kept the rate at 1¾ per cent resulting in a sharp break in that security and later on there was a decline in Tennessee Coal which also had an effect upon the market at large. American Steel and Wire has been the object of a great deal of attention on account of the stories which are circulated of dissensions in its management and the announcement that a stock exchange house has asked for proxies for use at the coming annual meeting, the purpose being to effect a change in the management. Statements that the iron and steel trades, while in a sound condition, are by no means coming, have a tendency to create caution not only in regard to industrials but the railroad list as well and offset to a considerable extent the continuance of good earnings by nearly all the leading systems.

Rumors of deals and combinations are still heard and support is given to many different groups of railroad stocks on this basis. It may also be noted that while speculative buying is of small proportions the investment demand for bonds and dividend paying stocks of the best class is on a large scale. The supply of high grade bond issues is not worthy and has led to a marked demand for securities of what may be termed the second rank. The January disbursements for dividends and interest will undoubtedly be the largest in the history of the United States and the demand for securities in which to reinvest a considerable portion of the fund thus released is being to a certain extent anticipated and discounted.

BANK CLEARINGS

New York, Dec. 7.—The following table compiled by Bradstreet shows the bank clearings at the principal cities for the week ending December 6 with the percentage of increase and decrease as compared with the following week last year:

New York Stocks.

New York, Dec. 7.—The prospect of a decline in cash resources of the banks of upwards of $5,000,000 proved too much for the fortitude of speculators today and they sold stocks reversing the movement of yesterday, although they had the advantage of new points of strength in a number of individual stocks amongst the low priced stocks. A pronounced tone in one or two of the industrials more than offset the advantage. The sub treasury alone has taken up from the banks during the week $6,100,000 including the deposits at the sub treasury for telegraphic transfer to the interior. The direct movement by express although supposed to be small on balance is certainly in favor of the interior. There is a suspicion also that the local movements of cash which have helped out the showing of the banks for the last few weeks is not to be relied on this week. These gains have been due to a large extent to the operation of a single bank in which is interested some of the most important interests in the financial world including copper mining stocks. The course of Amalgamated Copper during the week has given rise to the apprehension that interests identified with it need no be expected to have taken measures to conserve the general money market situation. The loan item also is the subject of much perplexity at this time. While there has been some speculative liquidation in the stock market there has been some large borrowing for outside financial operations including the subscriptions to a $10,000,000 issue of Third Avenue railroad bonds which also lost the day with the announcement that it has been largely oversubscribed. If there has been any considerable loan expansion double effect on the surplus reserves may prove somewhat sensational especially with the most trying period of the year on the money market to be immediately faced. Liquidation was not urgent in the stock market but was quite general. Even the Erie securities yielded temporarily on the denial of a story attempting to explain their movement by alleging that the company had purchased the Pennsylvania Coal company. Both the stocks and bonds however rallied subsequently to top prices.

On the other hand there was continued weakness in Tennessee Coal on persistent rumors that the dividend would be passed. The stock fell at one time 2⅝ and after fluctuating feverishly closed within one eighth of the lowest.

Business in bonds continued quiet. There was profit taking in some of the speculative issues but there was a notable increase in the demand for high grade bonds, which made the market very broad. Total sales, par value $1,13[illegible],000.

U S 2s and 5s declined ¼ in bid price.

Chicago Cattle

Chicago, Dec. 7.—Cattle—Receipts 4,700 head; natives good to prime steers $5.40@6.10; poor to medium $4.00@5.30; selected feeders $4.00; mixed stockers $2.25@3.90; cows $2.60@4.25; heifers $2.75@4.60; canners $2.00@2.60; bulls $2.50@4.30; calves $7.50@[illegible]; Texans fed steers $4.00@4.8[illegible]; grassers $3.25@3.10; bulls $2.50@3.25.

Hogs—Receipts 25,000 head; mixed and butchers $4.65@4.97½; good to choice heavy $4.80@4.97½; rough heavy $4.65@4.[illegible]; light $4.70@4.97½; bulk of sales $4.80@4.92½.

Sheep—Receipts 7,000 head; good to choice wethers $4.00@4.40; fair to choice mixed $3.[illegible]@4.0[illegible]; western sheep $4.00@4.40; Texas sheep $2.50@3.60; native lambs $4.00@5.50; western lambs $4.7[illegible]@5.[illegible]; one extra lot of 31 lambs averaging 107 pounds sold at $6.00.

Chicago Grain.

Chicago, Dec. 7.—The wheat market began the day with a show of firmness on Liverpool's steadiness in the face of the loss here yesterday, the light Argentine shipments and a cable announcing that rain was interfering with harvest work in that country. January wheat opened ⅛@⅜c higher at 71c to 71⅛c and sold during the first half hour to 71¼c. The feeling was bearish however and the bulge met liberal selling under the theory that continued liberal receipts and outside unwillingness to buy were not conditions calculated to sustain prices. January the feature was gradually pressed down during the forenoon to 70⅝@70¾c. At this point the market was reinforced by a fresh supply of bullish news. Holland and Portugal were reported as exporting points and the seaboard as well as Minneapolis reported a stiff cash demand. The receipt of this news caused a rally to 71⅜c and the close was firm, ¼c over yesterday at 71¼c.

Corn started out strong on small receipts, a contract grade and higher cables. The last half of the session was quiet and the trade professional.

Light receipts, small shipments and the usual lack of interest ruled the oats market.

Provisions opened lower in sympathy with a drop in hog prices and because Liverpool quoted bacon 6d lower. The market steadied with wheat and corn later in the day but closed with a small loss.

The leading futures ranged as follows:

Articles	Open	High	Low	Close
Wheat No 2—

Barley bu	[illegible]	10,000

On the produce exchange today the butter market was dull; creameries 15@21; dairy 13@20; cheese active 10¼@11; eggs quiet.

The Metal Market

New York, Dec. 7.—The local metal market ruled generally quiet and without special new features of importance aside from slight losses in tin and spelter. The weakness in tin was partly the result of heavy shipments from London. Outside market closed dull and weak at 27.25@27.50. In London though final prices indicated a net gain of £1 was at one time 7s 6d below the figures of the previous day. Lake copper ruled dull and nominally unchanged at $17 for Lake Superior and $16.62½ for casting copper despite easier advices from abroad. Lead while very dull locally was weak and 2s 6d lower in London, prices reaching the lowest market since February 1. The close here was dull at $4.37½. Spelter was unchanged abroad but exhibited an easier feeling here on liberal receipts and closed easy at $4.22½@4.25.

The domestic iron markets remained quiet and nominally unchanged while in London exceptional activity prevailed. Foundry Northern $15@16.00; southern $14.50@47.75; soft southern $14.00@15.75. Pig iron warrants $9.50@10.50.

The London Market.

New York, Dec. 7.—Commercial Advertiser's London financial cablegram: The markets here were less active and generally heavy today. Americans were dull early and weakened further on New York advices but the declines were most insignificant. Denver & Rio Grande preferred closed under the best, the market here thinking the price is high enough compared with, say, Atchison preferred. Eries were better. The chief feature in them was the rise in the general mortgage liens which New York bought. Missouri Pacifics were rather favored.

Money was in better demand owing to the exchequer bonds but rates were steady as the market was over provided. A supplementary estimate of £16,000,000 for expenditure in South Africa and China had no effect. The best opinion is that borrowing will be postponed until the new year.

The November trade returns show imports increased 12½ per cent; exports increased two; exports to America were lower and imports of cotton from America higher both in quantity and in value.

The bank lost £30,000 gold to Malta.

Coffee Market.

New York, Dec. 7.—Coffee: Spot Rio weak; No. 7 invoice 7⅝; mild quiet; Cordova 9½@12½.

Santa Claus can be seen in all his glory at Kaufman's basement.

THE GAZETTE'S SPECIAL ARTIST IS HARD AT WORK AMONG HIS CHRISTMAS MODELS.

STATE MINING NEWS.

LEADVILLE

Manager Jim Goodwin is putting in a new air compressor at the Monarch which is a very perfect little piece of machinery. The property is outputting 100 tons per day of good grade oxide and sulphide ore. This is extracted from the 500 foot level and goes to the Arkansas Valley and Globe smelters. Only about thirty men are employed and the mine is in splendid condition.—(Leadville Miner.

The Penn mining company will shortly begin the work of sinking No. 1 shaft of the Breece mine another lift and in order to be able to carry on the work of the raising and sinking at the same time the more successfully, some extensive surface improvements are being made. A new and powerful hoisting engine has taken the place of the much smaller one, the full capacity of which was taxed to hoist a car of sulphide from the bottom 700 feet, and the one removed has replaced a still smaller one at No. 3 where the shaft is not so deep. This releases a little hoister which is suitable for starting a new shaft on the surface. In order to meet the expected increased flow of water when the lower ore zone is tapped the power plant has been increased by two boilers making a battery of four boilers at No. 1 shaft. A new and strong gallows frame was found necessary when the hoisting power was increased and the shaft house is being raised and repaired. An improvement of a very peculiar nature on the new engine is in the friction clutch pinion the cogs of which are composed of rawhide. How these cogs have been prepared is not very clear but one layer after another seems to have been wrapped over the cogs which have been riveted by a wrinkle in the first layer. It is put in after the material had been soaked in water and glue. It became as solid and more powerful than iron as it became dry under tremendous hydraulic pressure. This addition is a great boon to the engineer as it runs without noise. They are said to be a great deal stronger than iron and on account of the glue in the untanned skin the amount of wear by friction is very greatly reduced. Only a sufficient quantity of oil can be used to hold plumbago to the cogs which will be used for lubrication instead of oil.—(Herald Democrat.

After many years of idleness the old shaft on the Deer claim is being started up with the intention that development will be pushed until the extension of the Ibex ore shoot is reached and blocked out. The shaft is located a short distance northeast of Little Jonny property and the ground of the two properties adjoin each other. The ground now to be developed consists of three claims and there is no doubt but they are located directly in the gold belt. The shaft has been retimbered and placed in good condition, a good shaft house has been built, a good boiler is in position and the little engine that did good service long ago will now be replaced by a new and larger one. It is said that mineral had been found when the shaft was abandoned many years ago on account of water and it is supposed that the mine will soon become a shipper. The pumps in the Ibex have drained the ground, so that development work can be conducted with little expense.—(Herald Democrat.

A Backwoods Eccentric.

Sometimes, though rarely, a woods life tends to make a man careless of his personal appearance. Old Am Washburn is a type of this kind. He has always fished and hunted and knows and cares for nothing else, barring perhaps chewing tobacco and food. As for clothes he would far rather live in a bear's hide than his own, for then he would have his bodily covering renewed by nature instead of unsympathetic fellow beings.

Am Washburn spends his winters in the poorhouse, but long before the ice is out in the spring he boards a freight train and travels to Rainbow Lake. He knows that Jim Wardner has a soft spot in his heart for a woodsman, even though his beard is in ropes like the tagl[illegible] of a sheep and the tobacco juice runs down to his knees with streaks along his crotches, and turns up at the back door about the same time each spring. There Mrs. Wardner meets Am, and while she holds him off at broom's length she sends for the hired help and by promises of divers quarters and a cigar finally secures volunteers to wash up Am.

The old hunter is taken out of sight and tubbed and soaped and his ropy beard and hair is cut, and he is lathered and combed and brushed till he doesn't know himself. Last year two pair of shears were spoiled cutting his hair. On this occasion Bill Williams was sent to bury the clothes which had been forcibly removed from old Am, and for weeks afterward Am bewailed the fact that fifteen cents had been buried with them. Williams absolutely refused to dig up the clothes, but finally Mrs. Wardner discovered the true cause of his trouble and made good the loss.

Am knows what manners are and is always polite to the ladies. On one occasion Mrs. Wardner sent one of the girls to get her a piece of pie after all the pie had been accounted for, and Am seeing the shortage politely proffered the piece he had been eating. When Mrs. Wardner was told the fact she got up hastily and left the table.

Perhaps the most thrilling of Wardner's hunting experiences is that relating to his killing a bear in his den. Wardner tells the story in a very matter of fact way. He tracked the bear in the snow to a ledge on the point of Loon Lake mountain and saw where it had disappeared in a small crevice under the ledge. His brother and he had been hunting in company but the brother had gone around to the other side of the mountain and Wardner was unwilling to take the time to summon him. He followed the bear in under the rock in total darkness and traveled on his hands and knees upward of 40 feet before he located the animal by the sound of its breathing.

Drawing a Colt's revolver and placing it beside him on the ground Wardner lay down on his face and leveled his rifle partly by the feeling of the walls of the den and partly by the sound of the breathing and fired. Dropping the rifle he instantly seized the revolver, holding it before him with the intention of firing at the moment he felt the bear's body in its outward charge. He steeled his mind to pull quickly, for if the bear carried the revolver back in its flesh over his body he might shoot his own heels. Fortunately for the hunter however the first shot killed the bear and the revolver was not called into play.—(Forest and Stream.

Help is needed at once when a person's life is in danger. A neglected cough or cold may soon become serious and should be stopped at once. One Minute Cough Cure quickly cures coughs and colds and the worst cases of croup, bronchitis, grippe and other throat and lung troubles. Hefley's Particulars Drug Co. and C. E. Smith, 111 Tejon St.

LEGAL NOTICES

Notice to Property Owners.

Office of the City Clerk,
City of Colorado Springs, Colo,
December 3, A D 1900

To the Owners of all the Lots and Parcels of Lands to Their Full Depth Abutting on Each Side of Cascade Avenue Between the Northerly Line of San Rafael Street and the Southerly Line of Del Norte Street, in the City of Colorado Springs.

You are hereby notified that the City Council of the City of Colorado Springs, Colorado, has adopted specifications and full details for grading curbing, macadamizing and parking all that portion of North Cascade avenue, in the city of Colorado Springs Colorado, between the northerly line of San Rafael street and the southerly line of Del Norte street, and have caused the city engineer to make a map of said street showing thereon the areas to be improved also the approximate amounts that will be assessed upon each piece or parcel of real estate abutting on said street, within the limits above named and an estimate of the total cost of said improvements That the total probable cost of said improvements, as shown by the estimate of the city engineer, is the sum of $33 749 24, that the probable cost for such improvement per front foot as shown by the estimate of the city engineer, is $5 99 4-10, and the probable cost for such improvement per front foot on the sides of corner lots abutting on the portion of Cascade avenue so improved as shown by the estimates of the said city engineer, is 88 6 cents that such improvements shall be paid for in ten (10) equal annual installments of principal the first of which installments shall be payable within one year from the 1st day of April, A D 1901, and the last installment to be payable on the 1st day of April A. D 1911 with interest on the unpaid principal, payable semi-annually, at the rate of six (6) per centum per annum, that on the 7th day of January, A D 1901, an ordinance ordering the improvements will be finally considered, that said map and estimate and schedule showing the amounts to be assessed and all the resolutions and proceedings are on file and can be seen and examined by any person interested at the office of the city clerk, in the city of Colorado Springs at any time within thirty (30) days after the first publication of this notice; and that all complaints and objections that may be made in writing concerning the proposed improvement, by the owner or owners of any real estate to be assessed, will be heard and determined by the city council before final action of the city council upon said ordinance

(Seal) I S Harris
City Clerk of the City of Colorado Springs

LEGAL NOTICES

Notice of Receiver's Sale

In the District Court
In and for El Paso County Colorado
The International Trust Company Trustee, Plaintiff
vs
The Manitou Mineral Water Company, C H Mallon and persons in interest, whose names are unknown, Defendants

Notice is hereby given that pursuant to the authority and direction of a decree of the district court of El Paso county, state of Colorado given and rendered June 30 1899 in the above entitled cause, I, Oliver C Townsend receiver of said The Manitou Mineral Water Company will on Saturday the 8th day of December, 1900, at the hour of 12 o clock noon, at the front door of the court house, in the city of Colorado Springs, county of El Paso and state of Colorado offer for sale sell and dispose of at public auction to the highest and best bidder for cash, all the right title and interest of said The Manitou Mineral Water Company and of the undersigned, as receiver of said company, in and to the following described personal property, to-wit All the goods and chattels situated and being in and about the bottling establishment and the buildings, warehouse and office thereunto belonging now or late of said The Manitou Mineral Water Company, at the town of Manitou, El Paso county aforesaid including all of the stock of materials stores and supplies such as bottles, boxes labels, wires corks and tin-caps, extracts excelsior, office furniture, fixtures and all other materials, stores and supplies, also all bottles on consignment or in the hands of third parties but belonging to the said The Manitou Mineral Water Company, or its receiver, also all the machinery, tools, implements and appliances in and about said buildings, or thereunto belonging, and kept for use or used in connection with the bottling establishment and business of The Manitou Mineral Water Company and not heretofore sold at foreclosure sale on October 16, 1899; also all the stock of mineral water, soda water ginger champagne sarsaparilla bottled goods and stock manufactured and in process of manufacture on date of sale also certain book accounts notes and claims due and belonging to the said company or to the undersigned, as receiver

All the above described property will be sold in one lot or parcel as an entirety as ordered and directed by said decree All of said property will be sold subject to the approval and confirmation by the court and the receiver will require any and all bidders at said sale to deposit in cash or certified check an amount equal to ten (10) per cent of the amount bid by such bidder or bidders as a pledge that he or they will make good such bid or bids if accepted by the court and the remainder of such purchase money shall be paid upon confirmation of the sale

For further particulars and information respecting said sale reference is hereby made to the provisions of said decree and inquiry may be made of the receiver at his office at the bottling establishment or factory of The Manitou Mineral Water Company at Manitou aforesaid, where full particulars as to said property will be furnished by the receiver on application

A statement showing as definitely as practicable all the assets to be sold has been delivered to Rufus C Thayer, Esq, commissioner in said cause, which can be seen upon application to said commissioner at his office in the Giddings building in Colorado Springs, El Paso county aforesaid

Dated November 30, 1900.
